1/ HEALING PERIOD = ACTUAL TIME LOST FROM WORK, DUE TO THE WORK INJURY, COUNTING SIX DAYS TO THE WEEK. THERE IS NO HEALING PERIOD, OF COURSE, FOR THE FATAL AND PERMANENT TOTAL DISABILITY CASES.

2/ COUNTING SIX DAYS TO THE WEEK, COMPENSABLE TIME = FOR FATAL, PERMANENT TOTAL AND TEMPORARY DISABILITY CASES, ACTUAL NUMBER OF DAYS PAID FOR; FOR PERMANENT PARTIAL DISABILITY CASES, TIME CHARGES ALLOWED UNDER THE WORKMEN'S COMPENSATION ACT OF WISCONSIN PLUS COMPENSABLE HEALING PERIOD TIME.

NOTE: A LETTER IN PARENTHESES DENOTES THE NUMBER OF PERMANENT TOTAL DISABILITY CASES. FOR EXAMPLE, (A) = 1 PERMANENT TOTAL DISABILITY CASE; (B) = 2 PERMANENT TOTAL DISABILITY CASES, ETC.

DECISION OF INTEREST DURING MAY 1966:

THE DECEASED WAS REGULARLY EMPLOYED BY THE RESPONDENT AS A CLERK ON THE DAYSHIFT IN THE SPRING OF 1965, FLOOD CONDITIONS PREVAILED ON THE RIVERS IN THE LA CROSSE AREA. THE ROAD TO RESPONDENT'S FRENCH ISLAND PLANT WENT UNDER WATER APRIL 12, 1965 AND RESPONDENT'S SUPERINTENDENT PROVIDED HIS PONTOON BOAT TO FERRY THE WORKERS FROM THE NORTHSIDE CITY DOCK. THE DECEASED WAS HIRED TO MEET AND FERRY THE 11:00 P.M. SHIFT AT 10:30 P.M. THE WATERS CONTINUED TO RISE AND THE POINT OF EMBARKATION WAS CHANGED. THE TWO NORMAL ROUTES HE WOULD USE TO DRIVE WERE CLOSED SO THAT HE HAD TO DRIVE FROM LA CRESCENT, MINNESOTA, TO EASTERN LA CROSSE, THEN NORTH TO ONALASKA AND SOUTH TO LA CROSSE. THE DECEASED ATTEMPTED TO CROSS THE WEST CHANNEL OF THE MISSISSIPPI WHILE GOING TO WORK AND WAS DROWNED.

THE EXAMINER DISMISSED BUT THE COMMISSION REVERSED ON THE THEORY THAT DECEASED WAS ENGAGED IN A SPECIAL ERRAND FOR THE BENEFIT OF THE RESPONDENT AT THE TIME OF INJURY AND THE DECEASED WAS COMPENSATED BY THE RESPONDENT FOR THE TRIP. AN INJURY ON A JOURNEY IS COMPENSABLE IF THE MAKING OF THAT JOURNEY IS PART OF THE SERVICE FOR WHICH THE EMPLOYE IS COMPENSATED.

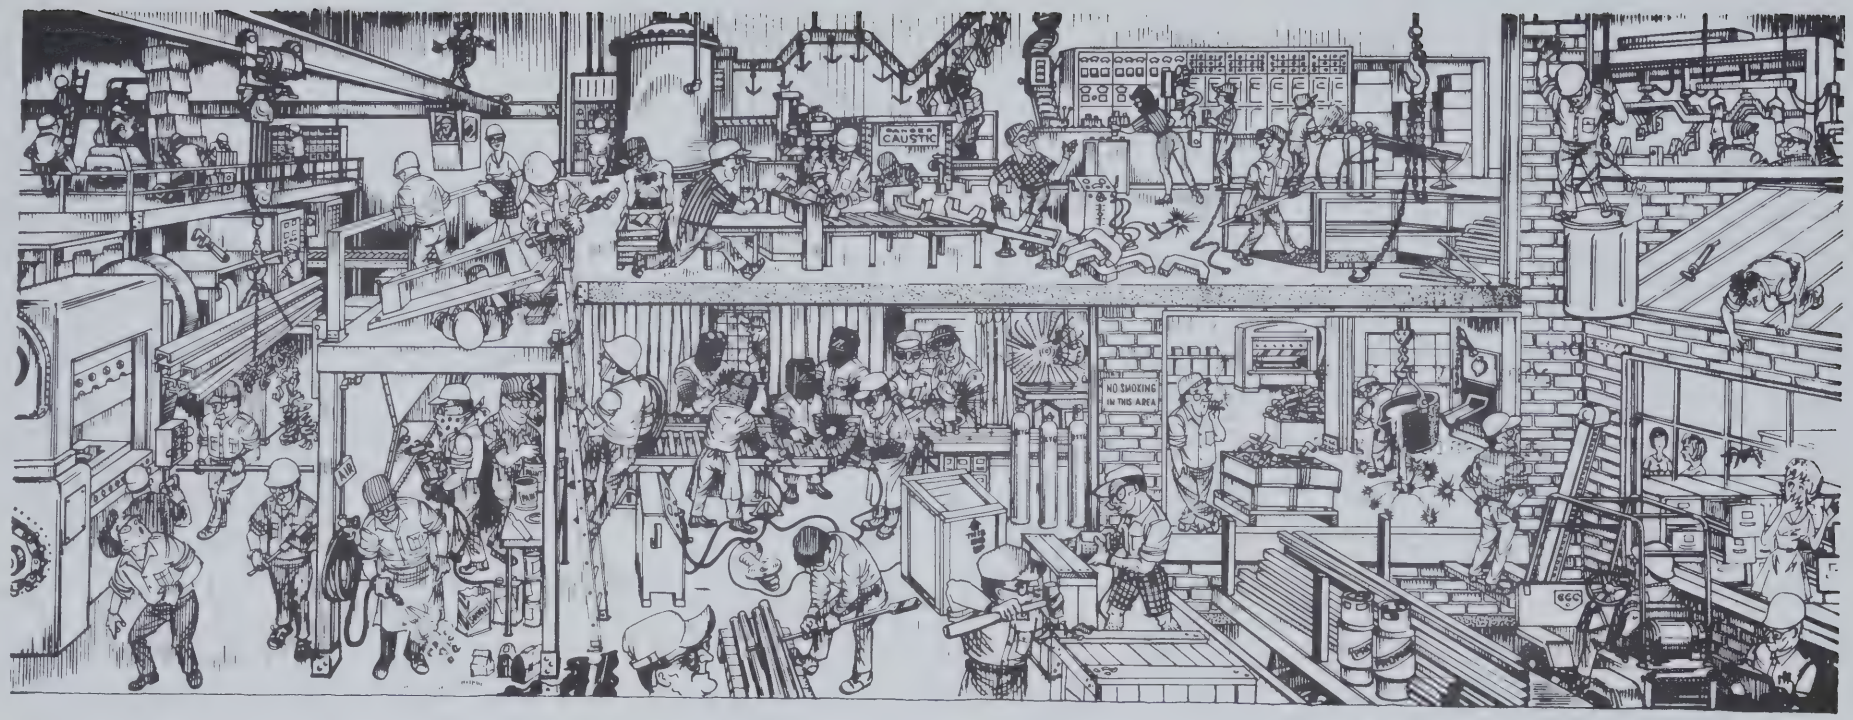
INDUSTRIAL COMMISSION OF WISCONSIN
STATISTICAL DIVISION
Hill Farms State Office Building/Madison



"Shambles Corporation"--an imaginary company where safety hazards abound--has been created by a large industrial firm to help make its employees more safety conscious.

The fictitious company, the product of a cartoonist's pen, was used by A. O. Smith Corporation in a company-wide safety awareness contest with $1,000 and $500 United States Savings Bonds as first and second grand prizes. The total value of prizes awarded throughout the company was $5,000.

A. O. Smith News, A. O. Smith Corporation

EXCERPTED FROM A. O. SMITH CORPORATION NEWS RELEASE:

IDENTIFYING 63 INDUSTRIAL SAFETY HAZARDS AT THE "SHAMBLES CORPORATION"--AN IMAGINARY COMPANY--WAS THE CHALLENGE PRESENTED TO A. O. SMITH CORPORATION EMPLOYES IN A COMPANY WIDE SAFETY AWARENESS CONTEST. CONTEST PRIZES TOTALED $5,000.

THE ARTIST'S CREATION WAS REPRODUCED IN THE COMPANY NEWSPAPER, A. O. SMITH NEWS, ALONG WITH A CONTEST ENTRY FORM. CLOSE TO 700 A. O. SMITH EMPLOYES ENTERED THE CONTEST AND COMPANY SAFETY OFFICIALS SAY THAT IT WAS PROBABLY ATTEMPTED BY SEVERAL HUNDRED MORE.

CONTESTANTS WERE ASKED TO IDENTIFY THE 63 HAZARDS AND WRITE A BRIEF STATEMENT ON "WHAT A SAFE PLANT MEANS TO ME." THE ESSAY WAS ORIGINALLY INTENDED TO BE USED AS A TIE BREAKER ALTHOUGH THE JUDGES DOUBTED THAT ANY EMPLOYE WOULD CORRECTLY IDENTIFY ALL 63 HAZARDS. AS IT DEVELOPED, SIX EMPLOYES DETECTED ALL HAZARDS WHICH RANGED IN DEGREEE OF OBVIOUSNESS FROM WALKING A BEAM TO FAILING TO PROVIDE AN EMERGENCY SHOWER AND EYE WASH FOUNTAIN.

IN THE A. O. SMITH NEWS CONTAINING THE ORIGINAL ANNOUNCEMENT OF THE CONTEST, FIVE FULL PAGES WERE DEVOTED TO THE REPRODUCTION OF THE ART WORK AND ENTRY FORM. THE SUBSEQUENT ISSUE ANNOUNCED THE WINNERS AND AGAIN REPRODUCED THE ART WORK WITH THE CORRECT ANSWERS.

"THE PRESENTATION OF THE ANSWERS PROVIDED A VISUAL AID NEARLY AS EFFECTIVE AS THE CONTEST ITSELF," SAID VINCENT POLLINA, CORPORATE DIRECTOR OF SAFETY. "THE CONTEST ENTRY FORM ALSO PROVIDED A CHANCE FOR EMPLOYES TO OFFER IDEAS AND COMMENTS ON THE COMPANY'S SAFETY PROGRAM.

"MANY EMPLOYES FELT THAT THE CONTEST WAS VISUAL EVIDENCE OF MANAGEMENT'S CONCERN FOR PLANT SAFETY AND WROTE TO EXPRESS APPRECIATION FOR A. O. SMITH'S AGGRESSIVE APPROACH TO ACCIDENT PREVENTION," HE SAID.

FIRST PLACE WINNER WAS FRANK W. LOEFFLER, AN ELECTRICIAN IN THE MAINTENANCE AND UTILITIES DEPARTMENT OF A. O. SMITH'S MILWAUKEE WORKS. SECOND PLACE WAS WON BY VERNON PARIS, A TOOL AND DIE MAKER AT THE COMPANY'S KANKAKEE, ILLINOIS, WATER HEATER PLANT. IN ADDITION, THERE WERE 16 PLANT CONTESTS WITH EACH PLANT NAMING INDIVIDUAL WINNERS AND PRIZES.

****

EXCERPTED FROM A. O. SMITH NEWS, A. O. SMITH CORPORATION, APRIL 1966:

FOR HIS TIE BREAKER STATEMENT ON "WHAT A SAFE PLANT MEANS TO ME," LOEFFLER WROTE:

"WORKING IN A SAFE PLANT MEANS THAT I KNOW I WILL COME HOME FROM MY JOB ACCIDENT-FREE EVERY DAY TO MY FAMILY AND LOVED ONES WHO ARE DEPENDING ON ME FOR THEIR SUPPORT.

"WHEN I LEAVE FOR WORK IN THE MORNING, MY WIFE AND FAMILY KNOW THAT ENDLESS AMOUNTS OF MONEY AND TIME HAVE BEEN SPENT TO MAKE MY PLACE OF WORK SAFE FOR ME AND MY FELLOW WORKERS. WE HAVE BEEN SUPPLIED WITH THE BEST POSSIBLE SAFETY EQUIPMENT AND HAVE BEEN INSTRUCTED IN ALL PHASES OF SAFETY PERTAINING TO OUR JOB AND AREA WHERE WE WORK. OUR FOREMEN HAVE HELD REGULAR SAFETY MEETINGS SO AS TO CONSTANTLY REMIND US ABOUT SAFETY.

"WHEN ONE KNOWS HE'S WORKING IN A SAFE SHOP, HE HAS A BETTER FEELING ABOUT HIS JOB AND FELLOW MEN, THUS TAKES PRIDE IN HIS WORK AND TRIES TO DO THE BEST HE CAN. I HOPE THAT WE AS INDIVIDUALS WILL ALWAYS PUT SAFETY FOR ONE ANOTHER FOREMOST IN OUR EVERYDAY THINKING. BY DOING THIS WE WILL CONTINUE TO MAKE A. O. SMITH A SAFE PLANT TO WORK IN AND A PROUD NAME IN INDUSTRY."

OPERATION SAFE PLACE

With the signing of Bill A-1061 on July 1, 1966, by Governor Warren P. Knowles, the Industrial Commission was launched on a new intensive effort in job safety. In signing the bill, Governor Knowles said, "The safest possible working conditions for our 1,700,000 workers is a moral demand and economic necessity. Bill A-1061 represents Wisconsin's determination to move forward in job safety, to make our state not only the best place to work, but the safest place to work as well."

Working with the other commissioners and my division, Commissioner Gene A. Rowland designed "Operation Safe Place." Bill A-1061 provides the resources and the means to put "Operation Safe Place" into practice.

Added to the inspection division will be 29 men; 6 men, to the plans and review section (the additions to the building plan review staff were not included in Bill A-1061 but were considered and approved as an emergency by the Board of Government Operations on March 15, 1966).

With this new staff, the commission will be able, for the first time, to set a positive accident prevention program in construction. We have had a code, but no resources with which to enforce it. This has been a real and serious gap.

The additional manpower will also make it possible to consolidate the now-existing inspection districts into smaller, more manageable areas. Rather than 1 man covering 10 or 15 counties, the inspectors will cover only part of 1 county in some instances and no more than 3 counties in the largest districts.

The State will be divided into 8 safety regions, and subdivided into 38 inspection districts. Each safety region will be headed up by a safety supervisor. Each district will have 1 or more inspectors within it.

In the districts which include heavily industrialized areas, inspection function will remain essentially as it operates today, with men specializing in certain areas of safety work.

In the other districts where there is only 1 man (or 2), these inspectors will be trained to become proficient in a variety of safety classifications. They will be able to inspect the machinery within a factory, inspect the structure itself, check to see that new buildings are being built in conformance with the plans submitted and approved, and check the construction site for safety features.

The safety features of buildings to be built in our State are the responsibility of the Building Plans Review Section. Formerly, it was almost impossible to provide prompt service to the building industry--because of the increasing number of plans coming into the commission and the greater complexity of techniques used in buildings these days. With the added staff, we should be able to overcome this problem.

INJURY CASES SETTLED INVOLVING VIOLATIONS OF CHILD LABOR LAW
1965

It is not very pleasant to read or hear of a minor becoming injured because he was involved in an industrial accident. We all feel more compassion towards a minor who has been injured than if the same accident happened to an adult.

Many injuries happen to minors because they are inexperienced or more inclined to engage in horse-play. They generally have not yet learned to fear and respect hazardous or dangerous machinery in motion. It takes experience to recognize accident-causing hazards.

The child labor law was designed to protect the health, safety, welfare and moral well-being of our young workers. The law and orders of the Industrial Commission list employments that are prohibited for minors of different ages. These employments are specifically mentioned and prohibited because experience has shown them to be particularly hazardous to the younger worker.

Any minor who is employed at an employment prohibited for a person of his age and is injured during the course of his employment is entitled to treble the amount of compensation normally recoverable.

For each minor under 18 years of age, an employer must have in his file a work permit issued by the Industrial Commission or one of its authorized permit officers before the minor begins his employment. A minor under 18 and working without a work permit who is injured during the course of his employment is entitled to double the amount of compensation normally payable in a given case.

In both the double and treble compensation cases, the increased compensation is paid to the injured employee by the employer.

In reading over this report one wonders how many of these accidents could have been prevented if compliance with the law had been observed.

We urge all employers to make sure that they familiarize themselves with the provisions of the child labor law before they employ or permit any minor under 18 years of age to begin his employment.

SELECTED SERIOUS WORK INJURIES IN MAY 1966:

A LINEMAN WAS GETTING INTO POSITION TO DEADEND PRIMARY CONDUCTORS ON A BUCK ARM POLE WHICH WAS TO REPLACE AN OLD POLE. HE HAD COVERED THE NEUTRAL CONDUCTOR WITH LINE HOSE. IN THE PROCESS OF GETTING ABOVE THE BUCK ARM TO COVER THE PRIMARY CONDUCTORS, HE UNBUCKLED HIS SAFETY STRAP. BEFORE HE COULD REBUCKLE IN NEW POSITION, HE FELL 35 FEET TO THE GROUND--FRACTURES: NECK, KNEE CAP, FOOT.

A GUST OF WIND BLEW A SIGN CLEANER OFF THE LADDER--FRACTURED HIP.

A FILLING STATION ATTENDANT "WAS FOLLOWING PROPER CARBURETOR ADJUSTMENT PER INSTRUCTIONS: ENGINE IDLING, TRANSMISSION IN DRIVE AND HEAD LIGHTS TURNED ON. HE LEANED OVER THE RADIATOR, REACHING OVER THE ENGINE. HIS FEET SLIPPED FROM UNDER HIM. HE FELL INTO THE ENGINE. REACHING TO SUPPORT HIMSELF, HIS HAND PUSHED ON THE GAS LINKAGE, THE CAR LUNGED FORWARD. ***** WAS NOW LYING ON TOP OF THE ENGINE. THE CAR HIT THE WALL, CRUSHING HIS LEGS."

SCAFFOLD FELL AND ROOFER FELL WITH IT. FRACTURED LEFT HIP, INTERNAL INJURIES.

Decisions of interest during 1965:

The only issue is whether the employer was liable for 6 per cent interest for delay in payment, pending an appeal under the provisions of section 102.22.

On August 2, 1963, the examiner awarded compensation. This order was petitioned for review and affirmed by the commission on October 2, 1963. Appeal was taken to the Dane County Circuit Court which affirmed the commission on October 9, 1964. The commission has held for many years that 6 per cent interest is due under these circumstances from ten days after the commission's order until payment is made, and in this case interest was awarded to the claimant in the sum of $433 and to his attorneys and several doctors in lesser amounts. The case has been appealed to the Supreme Court.

****

The applicant sustained burns to his wrist and both sides of his face. He was taken to a hospital, but released to his home the same day. His wife was a graduate nurse and, under the directions of the doctor, was able to provide necessary nursing care. The applicant entered into an agreement with his wife to pay her for the time spent in furnishing nursing services.

Although services performed by near relatives are presumed to be a gratuity, the commission affirmed the examiner's award, since there was an agreement to pay for services and she was in fact a nurse. If she didn't perform the services, applicant would either have remained in the hospital or would have required other nursing services at home.

****

The applicant was employed in the kitchen of respondent's nursing home. The son of the owner addressed vile language to the applicant, whereupon she slapped him in the face. He then assaulted her, resulting in alleged injury to applicant. The examiner found that the use of vile language did not make the employer's son the aggressor and that the applicant was in fact the aggressor, having struck the first blow. The injury did not arise out of the employment. The commission affirmed.

Selected serious work injuries reported, December 1965:

She placed cover on die, then placed hands on push button safety controls to trip press. Press ram and punch came down and then returned to normal position. When she reached into die to remove part, the adjustment screw sheared off, causing the punch and holder to fall on her hands. Amputation of right hand at wrist; amputation of thumb, index and middle finger of left hand.

He was erecting Christmas street decorations when he slipped from the back of the truck and fell to the pavement - skull fracture.

A gauge glass broke. While turning a valve to release boiler pressure, he slipped - hot water and steam burns, 70% of body.

He was taking out waste under clipper knife when knife dropped and amputated the ends of three fingers of left hand.

He was checking and adjusting draw roll brake band while tissue converter was operating. He got his hand under the rear guard up into nip of gears - amputation, hand at wrist.

He climbed on the cab of the crane to swing a load of steel. ("They are supposed to keep at least 10 feet away from all hoisted loads at all times.") The crane tipped over, pinning the employee - fractured pelvis.

Truck collision at intersection - truck driver suffered burns to 35% of body.

He brushed hay away from knives of hay chopper on discharge side - amputation, 4 fingers and thumb, left hand.

STEPHEN J. REILLY
Executive Secretary

To: All insurance carriers licensed to write workmen's compensation insurance in Wisconsin, and all exempt employers in Wisconsin.

We are distressed at having to report that workmen's compensation carriers and self insurers have set a couple of twenty year lows:

1. The poorest record since 1945 in percentage of prompt payments for insurance companies.

2. The poorest record since 1946 in percentage of prompt payments for exempt employers.

The Commission cannot continue to tolerate such slow payments to injured or ill workers. If the prompt payment rate does not soon show considerable improvement, it may be necessary to apply the sections of the Statutes which cover this problem area.

We realize there are extenuating circumstances which prevent prompt payment in some cases, but the slowdown this past year has been much too broad to fit into these circumstances.

To those carriers and companies who have maintained their prompt payment records we send our congratulations. To the others--and they know who they are--we suggest immediate action to speed up payments.

Sincerely yours,

Joseph C. Fagan, Chairman

IN VIEW OF YOUR RECENT INJURY, THE INDUSTRIAL COMMISSION WISHES TO GIVE THE FOLLOWING INFORMATION REGARDING BENEFITS PROVIDED BY THE WORKMEN'S COMPENSATION LAW.

MEDICAL TREATMENT

1. AFTER YOU REPORT YOUR INJURY AND THE NEED FOR TREATMENT, YOUR EMPLOYER IS REQUIRED TO PROVIDE A LIST OF A REASONABLE NUMBER OF PHYSICIANS FROM WHICH YOU MAY SELECT YOUR DOCTOR. YOU MAY HAVE A SECOND CHOICE IF YOU ARE DISSATISFIED WITH THE FIRST. YOU MAY ALSO APPLY TO THE COMMISSION FOR ANOTHER PHYSICIAN IF YOU ARE DISSATISFIED WITH THE DOCTOR SUPPLIED.

2. IF YOU FAIL TO SELECT A DOCTOR FROM A PROPER LIST YOU MUST PAY YOUR DOCTOR AND HOSPITAL BILLS.

3. IF YOU ARE REFUSED A CHOICE FROM A PROPER LIST OF DOCTORS, YOU MAY CHOOSE YOUR OWN DOCTOR. YOUR EMPLOYER OR HIS INSURANCE COMPANY WILL THEN BE LIABLE FOR NECESSARY MEDICAL AND HOSPITAL BILLS.

4. UPON REQUEST, YOU SHOULD SUBMIT PROMPTLY TO REASONABLE MEDICAL EXAMINATION BY ANY DOCTOR NAMED BY THE EMPLOYER OR INSURANCE CARRIER. FAILURE TO DO SO WILL SUSPEND COMPENSATION.

COMPENSATION

5. COMPENSATION PAYMENTS ARE DUE ON THE 11TH DAY AFTER THE BEGINNING OF DISABILITY AND WEEKLY THEREAFTER DURING DISABILITY. IF YOU HAVE NOT RECEIVED PAYMENT BY THE 15TH DAY AFTER DISABILITY COMMENCES, OR IF PAYMENTS ARE NOT MADE REGULARLY DURING DISABILITY, TAKE THE MATTER UP WITH YOUR EMPLOYER AND WRITE TO US.

6. NO COMPENSATION IS PAYABLE FOR THE FIRST THREE DAYS FOLLOWING THE DAY OF FIRST DISABILITY UNLESS YOU STILL HAVE DISABILITY AFTER THE 10TH DAY FOLLOWING THE DAY OF FIRST DISABILITY. THE DAY ON WHICH INJURY IS SUSTAINED IS NOT COUNTED AS A DAY OF DISABILITY FOR PAYMENT OF COMPENSATION.

7. FOR TOTAL DISABILITY, COMPENSATION IS 70 PER CENT OF YOUR AVERAGE WEEKLY WAGE, BUT COMPENSATION CANNOT BE MORE THAN $68.00 IN CASE OF TEMPORARY TOTAL DISABILITY, OR FOR PERMANENT TOTAL DISABILITY. FOR PERMANENT PARTIAL DISABILITY, COMPENSATION CANNOT BE MORE THAN $46.00, AND FOR ALL TYPES OF DISABILITY CANNOT BE LESS THAN $8.75 PER WEEK. FOR TEMPORARY PARTIAL DISABILITY, COMPENSATION IS PROPORTIONED TO WAGE LOSS.

8. IF YOUR WAGE WAS $97.15 PER WEEK OR MORE, YOU SHOULD RECEIVE THE HIGHEST COMPENSATION PAYABLE TO ANY EMPLOYE ($68.00 PER WEEK OR $46.00 PER WEEK AS ABOVE NOTED.) IF CORRECT COMPENSATION IS NOT PAID, WRITE TO US.

9. A FIXED NUMBER OF WEEKS OF COMPENSATION IS SET BY LAW FOR THE LOSS OR LOSS OF USE OF A MEMBER, AS A FOOT, HAND, FINGER, TOE, EYE, ETC. IF YOU HAVE ANY QUESTION, WRITE THE INDUSTRIAL COMMISSION.

10. RETURNING TO WORK DOES NOT END COMPENSATION SHOULD YOUR INJURY FORCE YOU TO QUIT AND AGAIN BE DISABLED.

11. ANY EMPLOYER WHO REFUSES WITHOUT REASONABLE CAUSE TO REHIRE AN EMPLOYE INJURED IN THE COURSE OF EMPLOYMENT IS SUBJECT TO A PENALTY OR FORFEITURE.

12. DO NOT BE AFRAID TO SIGN RECEIPTS FOR COMPENSATION PAYMENTS RECEIVED. WHEN ANY COMPENSATION HAS BEEN PAID, THE LAW KEEPS YOUR CLAIM OPEN FOR SIX YEARS, UNLESS HEARING IS HAD BEFORE THE COMMISSION OR COMPROMISE AGREEMENT IS SIGNED.

13. IF ANY QUESTION IS IN DISPUTE AND YOU MAKE A COMPROMISE SETTLEMENT (ACCEPTING LESS THAN YOU CLAIM DUE), THIS SETTLEMENT BECOMES FINAL, ALTHOUGH IT IS SUBJECT TO REVIEW ON REQUEST MADE WITHIN ONE YEAR. ALL COMPROMISES MUST BE APPROVED BY THE COMMISSION, AND IF NOT APPROVED, CLAIM WILL STILL BE OPEN.

14. PLEASE FILL OUT THE ENCLOSED POSTAL CARD SHOWING THE DATE ON WHICH YOU ACTUALLY RECEIVED THE FIRST COMPENSATION PAYMENT. IF THE PAYMENT HAS NOT YET BEEN RECEIVED, PLEASE KEEP THE CARD AND FILL IT OUT WHEN YOU RECEIVE THE FIRST PAYMENT. (SEE ALSO INSTRUCTIONS ON CARD.) IT IS VERY IMPORTANT THAT THIS POSTAL CARD BE ACCURATELY FILLED OUT AND RETURNED TO THE COMMISSION.

15. DO NOT HESITATE TO WRITE TO THE INDUSTRIAL COMMISSION IF YOU HAVE ANY QUESTIONS REGARDING THE WORKMEN'S COMPENSATION LAW, OR SETTLEMENT OF YOUR CLAIM. BE SURE TO GIVE NAME OF YOUR EMPLOYER AT THE TIME OF YOUR INJURY.

WORKMEN'S COMPENSATION DIVISION
INDUSTRIAL COMMISSION OF WISCONSIN

P.S. FOR INJURIES OCCURING BEFORE AUGUST 1, 1965, THE HIGHEST COMPENSATION RATE FOR TEMPORARY DISABILITY OR PERMANENT TOTAL DISABILITY WAS $64.00 AND THE HIGHEST RATE FOR PERMANENT PARTIAL DISABILITY WAS $44.50.

PROMPTNESS OF FIRST PAYMENT OF WORKMEN'S COMPENSATION

Procedures

Three items are sent to each employee (except State of Wisconsin employees) concerning whose work injury the Industrial Commission has received a Form WC-12, First Report of Injury:

1. A pamphlet, "Facts About the Workmen's Compensation Law"

2. Form WC-94, a form letter from the Workmen's Compensation Division (see preceding page)

3. Form ST-WC-31, promptness post card (see below)

THE REQUESTED INFORMATION IS REQUIRED IN ALL INJURY CASES. CORRECT YOUR NAME &ADDRESS IF SHOWN INCORRECTLY.

MAIL THIS CARD AS SOON AS POSSIBLE AFTER FIRST PAYMENT IS RECEIVED. BE SURE TO SHOW DAY YOU RETURNED TO WORK. (IF YOU HAVE RECEIVED NO PAYMENT 30 DAYS AFTER DATE OF YOUR INJURY, COMPLETE AND RETURN THIS QUESTIONNAIRE AT THAT TIME).

C O P Y

DO NOT FOLD, SPINDLE, OR MUTILATE THIS CARD.

The post card requires no postage on the part of the injured employee; postage is paid by the Industrial Commission under a first class permit. The promptness post card serves two main purposes: as a self-mailer for the pamphlet and form letter; as a check on the promptness of first payment of compensation.

Section 102.43, Workmen's Compensation Act of Wisconsin, provides:

> "If the injury causes disability, an indemnity shall be due as wages commencing with the fourth calendar day, exclusive of Sundays only, excepting where such employes work on Sunday, after the employe leaves work as the result of the injury, and shall be payable weekly thereafter, during such disability. If the disability shall exist after ten calendar days from the date the employe leaves work as a result of the injury and only if it so exist indemnity shall also be due and payable for the first three calendar days, exclusive of Sunday only, excepting where such employes work on Sunday. *******"

When the post cards are received by the Statistical Division, they are scrutinized for omissions and corrections. The injured employee is asked to correct the name and address on the card, if necessary. These changes are then furnished to the Workmen's Compensation Division.

The cards are then divided into two categories--accept or reject. Some of the reasons for rejecting a card are:

1. Employee reported no lost time due to the injury, or less than four days.
2. Employee reported that salary was paid in lieu of workmen's compensation.
3. Date of receipt of first payment was not given.
4. Payment was reported as having been received on or before the last day worked.
5. Date of receipt of first payment was later than date card was received by the Industrial Commission.

The rejected cards are filed away, and are not used in any of our tabulations.

A code for the number of days elapsed between date of disability and date of receipt of first payment is entered on all accepted cards except those which do not give date of disability. The cards are then further categorized into four groups: 1) prompt payments (first payments received within fifteen days after disability date), 2) late payments (first payments received more than fifteen days after disability date), 3) missing information, and 4) payments which appear insufficient, in prompt cases.

The prompt payment cards with sufficient payments are checked no further, and are processed.

The late payment cards are checked against Form WC-13, Supplementary Report on Accidents and Industrial Diseases (in the files of the Workmen's Compensation Division). All items entered on the card are checked for accuracy and reasonableness. The insurance file code is also checked, to make sure that the correct code was assigned to the insurance company or exempt employer involved. As the checking progresses, these cards are put into the two groups of "accept" or "reject".

The late payment cards are accepted if all items seem reasonably accurate. Some are rejected for various reasons, some of which follow:

1. The date and amount reported by the injured worker were for the second or subsequent payments, rather than for the first payment.
2. In certain cases of intermittent disability--e.g., where payment was not due for the first period of disability but became due after subsequent periods of disability.
3. In cases where there is too great a disparity between what the injured employee reported and the information entered on Form WC-13.

Cards with the following information omitted are also checked against Form WC-13: 1) amount of first payment, 2) date of return to work and 3) last day worked. If the last day worked was not reported but is found on Form WC-13, the number of days between date of disability and date of receipt of first payment is now entered on the card. If the payment was prompt and sufficient, the card is accepted and no further checking is done. If the payment was late, the procedure for late payment cards, as described above, is followed.

If the payment was prompt, but the amount of first payment seems insufficient, two tables are referred to. One table was set up to determine quickly the number of days for which compensation was due, using the last day worked and date returned to work to decide whether compensation was due for less than four days. The other table gives the acceptable amount of compensation per day and per week for specified wage brackets (the wage information asked for on the card is essential, therefore). If it can be determined by this method that the amount of the first payment was sufficient, the card is checked no further and processed with the other prompt cards.

If the employee has not reported the date of disability or the wage information, or if the amount still seems insufficient after using the two tables, the cards are checked against Form WC-13. If the amount was sufficient, the card is accepted and processed with the other prompt cards.

If the amount was not sufficient, the date and amount of the second payment are entered on the card. If the second payment had been made within a week after the first payment or by the eighteenth day after last day worked, the card is accepted as a prompt card. If the second payment was not paid by the eighteenth day after last day worked, the card is considered to be a late card; the time is computed from the last day worked to the second payment date.

This last procedure is one of the least understood. Assuming the risk of repetition, the following may clear up some of the misunderstanding:

Under the Workmen's Compensation Act of Wisconsin, a first payment of compensation is due and payable on the eleventh day after the commencement of disability. The payment then due is a full week's compensation if disability has continued for ten days. In cases where disability terminates before the tenth day, the payment should be the full amount due for the entire period of disability.

Therefore, the Commission can not allow credit for a prompt first payment where the injured employee has not received, within fifteen days after commencement of disability, the full amount due for compensable time loss within the first ten days after commencement of disability. This should explain why the card is checked as described above if the amount of the first payment seems insufficient.

TO BE CONSIDERED A PROMPT PAYMENT, A PAYMENT MUST NOT ONLY BE RECEIVED BY THE INJURED EMPLOYEE WITHIN FIFTEEN DAYS, BUT ALSO BE THE FULL AMOUNT DUE.

Actually, the Commission is much more lenient than the above suggests. The cards are checked for second payment only if the first payment seems to be for less than four days of disability. Also, if the second payment was made within a reasonable time after the first payment, as described above, the payment is still considered to be a prompt payment since it is assumed that subsequent payments will be made weekly, as prescribed by law.

A clue to the amount of work involved in checking the cards is that about 25% of the accepted cards are checked against Form WC-13 for one or more reasons. A certain amount of flexibility and good judgement is required, on the part of the checker, when the WC-13 and the ST-WC-31 do not agree as to dates or amounts.

The amount of work is added to by the fact that too many insurance companies and exempt employers are not complying with Rule Ind 80.02 (2) (a): "Self-insured employers and insurance companies on all accidents which require a first report must make a supplementary report on form WC-13 (formerly A-13) on the eleventh day following that on which the accident occurred."

If the WC-13 is not yet on file at the various checking times, the checker must look for it again later--and, sometimes, again and again and again.

Also, at times, the WC-13 does not contain the necessary information when some of the items are not completed. And, too many times, an insurance group is given under "insurer's name" rather than the individual insurance company. The carriers are licensed as individual companies, not as groups, and should be reported accordingly.

1/ AN EXEMPT EMPLOYER (SELF-INSURER) IS A SUBJECT EMPLOYER EXEMPTED FROM INSURING ALL OR PART OF HIS LIABILITY AS PROVIDED BY THE WORKMEN'S COMPENSATION ACT OF WISCONSIN. AN EMPLOYER WHO HAS BEEN GRANTED EXEMPTION FROM INSURING HIS RISK UNDER THE ACT MAY CARRY EXCESS INSURANCE IN ACCORDANCE WITH REGULATIONS OF THE INSURANCE COMMISSION WITHOUT FURTHER ORDER OF THE INDUSTRIAL COMMISSION. SUCH EXCESS INSURANCE IS NOT DEEMED TO BE FULL COVERAGE. INJURY CASES PROTECTED BY EXCESS INSURANCE ARE CLASSIFIED WITH EXEMPT EMPLOYERS.

CHILDREN'S ADDITIONAL DEATH BENEFIT FUND

July 1, 1923 - June 30, 1965

During its 42 years of existence, the Children's Additional Death Benefit Fund has aided 6,271 children, in 2,708 families, with payments of almost 5 1/4 million dollars. During the last fiscal year, over $320,000 was paid out of this fund.

Numerous changes have been made in the statutory provisions governing maximum payments into the fund.

EFFECTIVE DATE	MAXIMUM PAYMENT INTO FUND
JULY 1, 1923.....	$ 1,000
AUGUST 11, 1927.....	1,600
SEPTEMBER 17, 1935.....	2,000
AUGUST 6, 1947.....	2,500

JULY 1, 1953.....	4,000
JULY 1, 1955.....	5,500
MAY 5, 1957.....	11,000

A major change was made in Section 102.49 in 1959. Prior to April 1, 1959, payments were made by the employer or insurer only in fatal cases leaving no person wholly dependent for support. Effective April 1, 1959, payments into the fund by the employer or insurer were required as follows: $2,500 in all fatal cases leaving one or more persons wholly dependent for support; $11,000 in fatal cases leaving no person dependent for support; and a payment not to exceed $11,000 in fatal cases leaving one or more persons partially dependent for support. The $2,500 payment was made subject to automatic reduction under certain specified conditions (effective October 1, 1962 - $2,000; effective October 1, 1963 - $1,000; effective October 1, 1965 - $500).

The maximum weekly benefit rate payable to beneficiaries of the fund increased from $1.50 in 1943 to $6.32 in 1965.

The age for eligible children has changed from 15 years or under, effective July 1, 1923; 18 years or under, effective July 1, 1951; to 16 years or under, effective July 1, 1953. Since its inception, the fund has also made payments to children over the age limit if the child is mentally or physically incapacitated from earning - not more, however, than the amount payable to a child under one year of age.

(1) IN ACCORDANCE WITH THE CLASSIFICATION SYSTEM OF THE DICTIONARY OF OCCUPATIONAL TITLES (U.S. DEPARTMENT OF LABOR).

NOTE: IN THE VARIOUS TABLES WHERE ALPHABETICAL LETTERS ARE IN PARENTHESES AFTER A NUMBER, THE LETTER TELLS HOW MANY FATAL CASES WERE INCLUDED IN THE NUMBER OF CASES FOR A GIVEN CATEGORY. FOR EXAMPLE, (A) DENOTES 1 FATAL CASE, (B) DENOTES 2 FATAL CASES, ETC.

O.U. = OTHER OR UNSPECIFIED; N.E.C. = NOT ELSEWHERE CLASSIFIED.

Decision of interest during February 1966:

The applicant was a crossing guard at an assigned corner. He was required to be at the corner at 7:55 AM to place a school stop sign after having checked in with the police department. On the morning of March 8, 1965, he had time to spare so he stopped in at the school on his way to his corner. On leaving the school, he slipped and fell while on the school grounds. He then reported for duty to the police department and reported to his corner.

The examiner allowed the claim but the Commission reversed the order finding that he had not as yet reported for work and that he was not performing services growing out of and incidental to his employment at the time of injury.

CANNING INDUSTRY IN WISCONSIN

Work Injury Highlights - 1965

For the years 1960 through 1964, between 17 and 21 disabling work injuries occurred in the canning industry in Wisconsin during each million man-hours worked. U. S. averages for this industry ranged from 22 to 25, for the same period. (1965 figures are not yet available.)

	1960	1961	1962	1963	1964
Injury frequency rate:					
U. S. averages.....	22.6	22.8	23.7	22.5	24.7
Wisconsin averages....	20.8	20.4	21.0	19.3	17.7

Wisconsin's canning industry can be proud of the fact that 28.3% less disabling work injuries occurred, per million man-hours worked, in Wisconsin in 1964, than in the canning industry in the U. S. as a whole. It is interesting to note, however, the following percentage changes that apply to the canning industry in Wisconsin:

Year	Injury Frequency Rate	% Change	Number of Reporting Units	% Change	Employment Reported (Rounded)	% Change
1960	20.8		116		8,100	
1961	20.4	- 1.9	108	- 6.9	8,000	- 1.2
1962	21.0	+ 2.9	114	+ 5.6	8,800	+ 10.0
1963	19.3	- 8.1	106	- 7.0	8,000	- 9.1
1964	17.7	- 8.3	100	- 5.7	7,600	- 5.0

Our workmen's compensation statistics show what kind of accidents are causing the work injuries, and their results. Using the data for the 1965 compensable work injury cases settled under the Workmen's Compensation Act of Wisconsin:

1. There were 265 compensable work injury cases settled: 47 permanent partial and 218 temporary disability cases.

2. Average indemnity decreased from $571 in 1964 to $450 in 1965; average medical aid also decreased, from $255 to $224. These figures do not include the many other costs incurred as a result of these work injuries.

3. There were 6 injury cases with employer violations of safety orders. The total amount of extra indemnity paid by employers amounted to $1,764.20. Comparable figures for 1964: 8 cases and $2,665.31 in extra indemnity.

4. There were 2 injury cases in which the employer violated the Child Labor Law; extra indemnity paid by the employers in these cases was $1,831.35.

5. The average weekly wage of the injured employees was $73.63, compared to $68.90 for 1964.

6. The median age of the injured workers was 41 (43 in 1964). 21 of the injured workers were under 18 years of age; 28 were 18 through 20; 8 were over 65 (the oldest was 71).

7. The actual time loss paid for (compensable time loss for the temporary disability cases + time charges and compensable healing period time for the permanent partial disability cases) was 2,674-1/3 weeks. In other words, the actual time

loss paid for was the equivalent of paying an extra 51 employees for a full year at a wage equal to the amount allowable for work injuries. The average compensable time for the 47 permanent partial disability cases was 42-1/2 weeks; for the 218 temporary disability cases, a little over 3 weeks.

8. The total healing period for the 265 cases was 1,314 weeks. This is the equivalent of the loss of a year's full time work by more than 25 workers. The average healing period for the 47 permanent partial disability cases was over 12-1/2 weeks; for the 218 temporary disability cases, 3-1/3 weeks.

9. Falls accounted for more than 22 out of every 100 work injuries, and almost $21 out of every $100 in indemnity and medical aid.

10. Almost 27 out of every 100 work injuries occurred when an employee was struck by or struck against an object, accounting for almost $29 out of every $100 in indemnity and medical aid.

11. More than 20 out of every 100 work injuries were due to being caught in, on, under or between objects; over $37 out of every $100 in indemnity and medical aid was payable for the resultant injuries.

12. Overexertion accounted for less than 8 out of every 100 work injuries, and only $2 out of every $100 in indemnity and medical aid.

13. Machines and machinery were the source of injury in over 16 out of every 100 cases, and accounted for almost $30 out of every $100 in indemnity and medical aid.

14. Working surfaces were the source of injury in almost 20 out of every 100 cases, and accounted for almost $19 of every $100 in indemnity and medical aid.

15. Containers were the source of injury in almost 13 of every 100 cases, but accounted for only $7 out of every $100 in indemnity and medical aid.

16. Although only 5 out of every 100 injured employees suffered amputations, these cases accounted for over $13 of every $100 in indemnity and medical aid. 12 employees suffered amputation of 1 finger, or a part thereof; 1 lost 3 fingers, or parts thereof; 1 lost part of a toe.

17. Fractures accounted for more than 15 out of every 100 injuries, and almost $16 out of every $100 in indemnity and medical aid.

18. Strains, hernias and related injuries occurred in about 22 out of every 100 cases.

19. Employees suffered injuries to the trunk in more than 20 out of every 100 cases; back injuries comprised almost half of these injuries. Injuries to the fingers were the costliest: they occurred in over 20 out of every 100 cases, and cost almost $32 out of every $100 in indemnity and medical aid.

20. There were 14 occupational disease cases: 6 dermatitis cases, 8 cases with inflammation or irritation of joints, tendons or muscles.

Because of the seasonal nature of the canning industry, many of the workers are relatively inexperienced. This lack of continuity in employment calls for the development of a concise, hard-hitting safety education program.

NOTE: THE TOTAL INDEMNITY AND MEDICAL AID DO NOT EXACTLY EQUAL TOTAL BENEFITS, IN SOME CASES, BECAUSE OF ROUNDING OF FIGURES.

STAT. RELEASE 3794
FEBRUARY 25, 1966

JANUARY

1966

Decision of interest during January 1966:

Applicant was employed by the employer as a newsboy and was 15 years of age at the time of his injury on Sunday, March 14, 1965. He had been instructed to report to the employer's newspaper station at 3:30 a.m. to sub the Sunday newspapers and was injured at about 4:00 a.m. outside the station. The newspapers had not yet arrived and the captain, as well as the assistant captain who were inside the station, kept the door locked so that the claimant and other newsboys could not enter. The boys outside had engaged in horseplay, but claimant withdrew from such activity previous to his injury, although he did sustain injury as a result of horseplay by the other newsboys. This involved pushing boards in and out of the station through cracks in the door. It was concluded that the employer did not establish or enforce reasonable rules of conduct for the safety of its newsboys who might normally be expected to engage in horseplay activity while they were idle, considering their youth and energy. Claimant was at the news station pursuant to the instructions of the employer, waiting to perform his work. It was held that the injury was compensable.

Decisions of interest during 1965:

The only issue is whether the employer was liable for 6 per cent interest for delay in payment, pending an appeal under the provisions of section 102.22.

On August 2, 1963, the examiner awarded compensation. This order was petitioned for review and affirmed by the commission on October 2, 1963. Appeal was taken to the Dane County Circuit Court which affirmed the commission on October 9, 1964. The commission has held for many years that 6 per cent interest is due under these circumstances from ten days after the commission's order until payment is made, and in this case interest was awarded to the claimant in the sum of $433 and to his attorneys and several doctors in lesser amounts. The case has been appealed to the Supreme Court.

****

The applicant sustained burns to his wrist and both sides of his face. He was taken to a hospital, but released to his home the same day. His wife was a graduate nurse and, under the directions of the doctor, was able to provide necessary nursing care. The applicant entered into an agreement with his wife to pay her for the time spent in furnishing nursing services.

Although services performed by near relatives are presumed to be a gratuity, the commission affirmed the examiner's award, since there was an agreement to pay for services and she was in fact a nurse. If she didn't perform the services, applicant would either have remained in the hospital or would have required other nursing services at home.

****

The applicant was employed in the kitchen of respondent's nursing home. The son of the owner addressed vile language to the applicant, whereupon she slapped him in the face. He then assaulted her, resulting in alleged injury to applicant. The examiner found that the use of vile language did not make the employer's son the aggressor and that the applicant was in fact the aggressor, having struck the first blow. The injury did not arise out of the employment. The commission affirmed.

elected serious work injuries reported, December 1965:

She placed cover on die, then placed hands on push button safety controls to trip press. Press ram and punch came down and then returned to normal position. When she reached into die to remove part, the adjustment screw sheared off, causing the punch and holder to fall on her hands. Amputation of right hand at wrist; amputation of thumb, index and middle finger of left hand.

He was erecting Christmas street decorations when he slipped from the back of the truck and fell to the pavement - skull fracture.

A gauge glass broke. While turning a valve to release boiler pressure, he slipped - hot water and steam burns, 70% of body.

He was taking out waste under clipper knife when knife dropped and amputated the ends of three fingers of left hand.

He was checking and adjusting draw roll brake band while tissue converter was operating. He got his hand under the rear guard up into nip of gears - amputation, hand at wrist.

He climbed on the cab of the crane to swing a load of steel. ("They are supposed to keep at least 10 feet away from all hoisted loads at all times.") The crane tipped over, pinning the employee - fractured pelvis.

Truck collision at intersection - truck driver suffered burns to 35% of body.

He brushed hay away from knives of hay chopper on discharge side - amputation, 4 fingers and thumb, left hand.

On the lighter side -

A construction worker was injured when "struck by a petition."

"He caught hell under truck."

"When she fell downstairs, she injured her left nose."

"His truck was sideswiped by a train."

"While kneeling, he stood up."

Entered under source of injury and accident type: "Transporting juvenile to detention home." Entered under nature of injury and part of body: "Pain in neck."

Entered after sex: "Yes."

Entered after occupation: "No-good loafer."

Entered after place of occurrence: "In the back."

And - shades of a certain ad - "This wasn't reported sooner because he took his back to Florida."

OCCUPATIONAL DISEASES

Memo from the Industrial Commission:

Twenty-five years ago, industry was using about 500 chemicals. Today, industry is using more than a half-million chemicals.

These new products, and resulting new processes, have been a boon to industry and the public. As can be expected, some new hazards have been created, usually in the form of respiratory infections and other allergic reactions. The most difficult part of the situation is that the deleterious effects are not always recognized as being due to these compounds.

How can the effects of new chemicals and new processes be measured? How can they be controlled?

To find out the answer to these questions, we have held several conferences and appointed a special advisory committee. Our aim is to pursue a medical and preventive approach, based on study and research, with the idea of advising the public, industry and labor on the proper use and handling of chemicals. (You will find an article on polyurethane foam in this release, written by a special subcommittee.)

The wheels have been set in motion. We are asking--and getting--the cooperation of labor, management, government and the public. It is inspiring to work toward such a common benefit.

Polyurethane Foam

Plastics of various kinds have been widely used in industry for many years. The raw materials from which some of them are made exhibit harmful properties, leading to problems when safe handling procedures are not known or not followed.

One such plastic is polyurethane foam, popularly used as an insulating material in the construction industry and elsewhere. It can either be poured in place between partitions or into voids or sprayed onto surfaces.

Polyurethane foam is made by mixing a resin base with a material called toluene di-isocyanate (TDI). Upon mixing, a chemical reaction takes place, generating heat and carbon dioxide gas and curing the resin. The gas expands through the curing resin and is trapped as tiny bubbles throughout the expanded plastic. The process is similar to baking a cake, in which baking soda liberates carbon dioxide, expanding the mix into a cellular mass.

TDI is carefully measured so that it is completely combined in the cured plastic, but its vapors can be given off during mixing, foaming and curing or through accidental spillage.

Both the liquid TDI and its vapors are irritating to the skin, eyes and respiratory tract. Repeated exposure can lead to an allergic-like reaction in some susceptible persons. When this occurs, the sensitized individual reacts to concentrations of TDI having no effect on him previously or no present effect on fellow workers. Most commonly in such instances, breathing TDI vapors brings on an asthma-like attack, which can be so severe as to require hospitalization.

Contact with TDI can be avoided through the general safe procedures which have been outlined below. These procedures should, of course, be modified according to specific job situations.

1. Workers should be made aware of the hazards involved in using TDI and be familiar with the safe precautions for handling it. This includes a knowledge of the proper use of safety equipment provided.

2. Those handling liquid TDI should wear proper eye protection and impervious wearing apparel to cover exposed body parts. Accidental splashes should be washed off as soon as possible and contaminated clothing removed to avoid prolonged contact.

3. If TDI comes in contact with the eyes, they should be flushed with water at once. Prompt medical treatment after first aid is a must.

4. All areas where TDI is stored should be well ventilated. If it is not, persons entering the area to draw TDI from storage into other containers should wear organic vapor cartridge (chemical cartridge) respirators.

5. Areas where TDI is used for production purposes should either be mechanically ventilated, preferable with local exhaust ventilation at the source of contamination, or all personnel in the area provided with suitable respiratory protection. Segregation of the work area with tarpaulin or work curtains of some sort is helpful in confining the atmospheric contamination.

   The respiratory protection will vary according to severity and duration of exposure. The following is offered as a guide to proper selection.

   a. If the resin-TDI mixture is poured in the open, an organic vapor cartridge respirator may be sufficient for the operator.

   b. If the resin-TDI mixture is poured in a confined space, or is sprayed in the open, the operator should wear a full face, large canister respirator.

   c. If the resin-TDI mixture is sprayed in a confined space, the operator will need a full face air-supplied or self-contained respirator.

   Any other persons who are required to work in the same area should normally wear the same respiratory protection as the operator.

6. Accidental spills of TDI should be cleaned up immediately.

   a. In case of severe spills, all personnel should evacuate the immediate area.

   b. Personnel equipped with full face, large canister respirators should cover the spill with absorbent material such as Fuller's Earth or an absorbent clay, sweep up the absorbent into an open container, place in a ventilated area, fill with water, let stand for a day and then discard.

7. TDI is flammable, but has a relatively high flash point (about 270°F). If a fire should start, carbon dioxide or dry chemical extinguishers are effective. Adequate respiratory protection in the form of full face large canister respirators, as a minimum, should be worn by fire-fighting personnel.

   It should be recognized that the above safety procedures are general in nature, and it is strongly urged that precautions for specific TDI applications be reviewed with competent specialists. These include Industrial Commission Deputy Inspectors, Industrial Hygiene Engineers of the State Board of Health or Field Safety Engineers and Hygienists of the Compensation Insurance Carrier.

FOOTNOTES FOR TABLE 184.4 – 1964

1/ HEALING PERIOD = ACTUAL TIME LOST FROM WORK DUE TO THE WORK INJURY, COUNTING 6 DAYS TO THE WEEK.

2/ COUNTING 6 DAYS TO THE WEEK, COMPENSABLE TIME = FOR FATAL, PERMANENT TOTAL AND TEMPORARY DISABILITY CASES, ACTUAL NUMBER OF DAYS PAID FOR; FOR PERMANENT PARTIAL DISABILITY CASES, TIME CHARGES ALLOWED UNDER THE WORKMEN'S COMPENSATION ACT OF WISCONSIN PLUS COMPENSABLE HEALING PERIOD TIME.

T = TEMPORARY DISABILITY; PPD = PERMANENT PARTIAL DISABILITY.

NOTE: ALTHOUGH MEDICAL AID IS NOT SHOWN IN SOME CASES, THIS DOES NOT NECESSARILY MEAN THAT THERE WAS NO MEDICAL AID. IN MOST OF THESE CASES, THERE WAS CONTRACT MEDICAL AID.

SELECTED SERIOUS WORK INJURIES REPORTED IN OCTOBER 1965:

PUNCH PRESS OPERATOR SUFFERED PARTIAL AMPUTATION OF INDEX, MIDDLE AND RING FINGERS OF RIGHT HAND. HIS HAND CAUGHT IN DIES WHEN HE TRIPPED THE PRESS WHILE LOCATING THE STOCK IN THE LOWER DIE. THE PRESS DIES WERE GUARDED BY MEANS OF PULL-OUT DEVICES. INVESTIGATION PROVED THAT THERE WAS NO SAFETY VIOLATION BY THE EMPLOYER.

BOILER HOUSE FOREMAN TOLD FELLOW EMPLOYEE TO PUSH THE START BUTTON ON THE STAR VALVE OF THE DUST COLLECTOR. WHILE OTHER EMPLOYEE WENT TO THE CONTROL PANEL, HE PUT HIS HAND THROUGH THE INSPECTION OPENING TO SEE IF ANYTHING WAS CAUGHT IN THE STAR VALVE. HIS HAND WAS CAUGHT IN THE VALVE, WHEN OTHER EMPLOYEE PUSHED THE START BUTTON. AMPUTATION, TIPS OF RIGHT INDEX, MIDDLE, RING AND LITTLE FINGERS.

WHILE MAINTENANCE MAN WAS OPERATING A POWER SAW, IT SLIPPED; AMPUTATION, FOUR FINGERS.

FARM LABORER REACHED FOR SOME POTATO VINES; HE CAUGHT HIS ARM IN GEAR AND ROLLER CHAIN OF POTATO HARVESTER. HIS LEFT ARM WAS BADLY INJURED, THUMB SURGICALLY AMPUTATED.

WHILE TAPERING CIRCULAR COVERS IN PUNCH PRESS (EQUIPPED WITH PULL-UP GUARDS), PRESS OPERATOR FAILED TO ENGAGE GUARD HANDCUFFS TO RIGHT HAND. AMPUTATION, LITLLE, RING AND MIDDLE FINGERS AT PROXIMAL JOINTS; AMPUTATION, INDEX FINGER, HALF OF SECOND PHALANGE.

WHILE CLEANING CORNPICKER, FARM LABORER'S HAND GOT CAUGHT (POWER TAKEOFF WAS RUNNING). AMPUTATION, RIGHT HAND.

DECISION OF INTEREST DURING OCTOBER 1965:

THE DECEASED WAS THE PRESIDENT OF TWO COMPANIES LOCATED IN WISCONSIN. HE RESIDED IN ANOTHER STATE AND WAS FATALLY INJURED WHILE FLYING FROM HIS HOME TO WISCONSIN IN A PLANE OWNED BY ONE OF THE COMPANIES, THE OPERATING EXPENSES OF WHICH WERE PAID BY THE OTHER COMPANY. THE PLANE WAS PURCHASED TO EXPEDITE THE WEEKLY SUPERVISION OF THE BUSINESSES BY THE DECEASED, WHO WAS THE ONLY OPERATOR OF THE PLANE.

THE FIRST COMPANY WAS CONSIDERING THE MANUFACTURE OF A CERTAIN ITEM. THE DECEASED FLEW TO WISCONSIN TO OBTAIN THIS ITEM. THE INSURANCE CARRIER HAD COLLECTED PREMIUM FROM THE RESPONDENT, THE FIRST COMPANY, BASED TO A SUBSTANTIAL DEGREE ON THE SALARY OF THE DECEASED. THE INSURANCE CARRIER KNEW THE DECEASED WAS THE SOLE OPERATOR OF THE PLANE, WHICH WAS SEPARATELY CODED IN THE AUDIT AND PREMIUM COLLECTED ACCORDINGLY.
THE COMMISSION REVERSED THE EXAMINER, HOLDING THAT THE INSURANCE COMPANY IS NOW ESTOPPED FROM DENYING AN EMPLOYER-EMPLOYE RELATIONSHIP AND AWARDED DEATH BENEFITS TO THE WIDOW.

SELECTED SERIOUS WORK INJURIES REPORTED IN SEPTEMBER:

COMPANY NURSE WAS CALLED TO FOUNDRY; SHE FOUND EMPLOYEE SITTING ON A CHAIR, BENDING OVER A WASTEBASKET AND SPITTING UP BLOOD-TINGED MUCUS. HIS RIGHT EYE WAS INFLAMED AND THERE WERE TWO SLIGHT ABRASIONS ON HIS RIGHT EYEBROW. HE STATED THAT HE WAS REMOVING A PLUG FROM THE AIR PRESSURE TANK; THE FORCE OF THE AIR CAME OUT DIRECTLY INTO HIS MOUTH. POSSIBLE LUNG INJURY.

EMPLOYEE, USING CORN SHELLER, CAUGHT HIS HAND IN THE FAN. AMPUTATION, RIGHT HAND.

INJURED AND CO-WORKERS WERE MOVING A POWER PANEL IN PLACE FOR CONNECTING. THE PANEL WAS BOLTED TO THREE SKIDS. AFTER REMOVING THE BOLTS, PANEL WAS SLID OFF SKID ONTO THE 4-INCH PIPES WITH PINCH BARS. THE PANEL STARTED TO TILT TOWARD AREA THAT IT WAS MOVED FROM. THE FALLING PANEL HIT ANOTHER PANEL ALREADY ERECTED, SCRAPING AND PUSHING THE PLACED PANEL OFF ITS PAD. THE FALLING PANEL THEN FELL ONTO THE INJURED'S LEFT ARM, PINCHING THE ARM BETWEEN THE CONCRETE PAD AND A CORNER OF THE FALLEN PANEL. AMPUTATION, LEFT ARM.

WORK INJURIES REPORTED UNDER WORKMEN'S COMPENSATION ACT OF WISCONSIN

STAT. RELEASE 3783
AUGUST 31, 1965
INDUSTRIAL COMMISSION OF WISCONSIN
STATISTICAL DIVISION

JULY - 1965

Re: 1965 Amendments to the Workmen's Compensation Act

Chapter 166, Laws of 1965, which effects amendments to the Workmen's Compensation Act, was signed by the governor on July 30 and was published July 31, 1965. These amendments were agreed upon and were recommended by the Workmen's Compensation Advisory Committee. The changes are effective and apply to all injuries occurring after 12:01 A.M., August 1, 1965. A synopsis of the changes is set forth below.

Sub section 102.11 (1). The maximum weekly wage for temporary disability, permanent total disability, and death benefits is increased to $97.15. This increases the maximum weekly compensation from $64 to $68 for temporary and permanent total disability, and to $48.57½ for death benefit. The maximum death benefit is increased from $18,286 to $19,430. The maximum weekly wage for permanent partial disability is raised to $65.72, resulting in an increase of the maximum weekly compensation rate from $44.50 to $46.

Section 102.42 (8). This was created to expedite the payment of medical expense on state employe claims. The employing department may approve payment of the initial or total medical expense, up to a gross of $50 for each injury case, without formal order from the commission.

Sub section 102.47 (2). The amount allowed for funeral expense was changed to $500 to be consistent with the allowance under section 102.50, which previously provided a burial allowance of $500.

Sub section 102.52 (17) & (18). The scheduled allowance for total deafness from an accident or sudden trauma was changed from 333-1/3 weeks to 330 weeks for both ears and from 50 to 55 weeks for one ear, to provide a ratio of 1-6 as recommended by the AMA Guide for Evaluation of Impairment of Hearing and as provided for occupational deafness under section 102.555.

Section 102.58. This relates to 15% decreased compensation where an employe fails to use a safety device or to obey a reasonable safety rule. The word "wilful" was eliminated. The safety device must be provided and adequately maintained and the use of it must be reasonably enforced by the employer or compensation cannot be decreased. A safety rule adopted by an employer must also be reasonably enforced and an employe must have notice of the rule or compensation cannot be decreased.

SELECTED SERIOUS WORK INJURIES REPORTED IN JULY:

"EMPLOYEE WAS RIDING IN A CAGE THAT WAS BEING LOWERED FROM UPPER PART OF ORE DOCK TO CENTER SECTION. THE CAGE CAUGHT ON A PROJECTED TIMBER, CAUSING IT TO DROP SEVERAL FEET. HE LOST HIS BALANCE AND SAT DOWN ON A CHAINSAW BLADE — 5 INCH CUT."

"WHILE EMPLOYEE WAS OPERATING THE PRESS, IT CAME DOWN ON HIS LEFT HAND — AMPUTATION OF 4 FINGERS AT PROXIMAL."

"SALESGIRL WAS ON A 3-FOOT LADDER; SHE STEPPED OFF, APPARENTLY FORGETTING SHE WAS ON A LADDER, AND FELL TO THE FLOOR. FRACTURED VERTEBRAE AND RIGHT ARM."

"EMPLOYEE SLIPPED ON A PLANK ON TOP OF A TANK AND FELL TO THE FLOOR. BRAIN CONCUSSION, FRACTURED HIP, FRACTURED TIBIA AND FIBULA, FRACTURED ULNA AND RADIUS."

"AS EMPLOYEE CHANGED COILSTOCK ON PUNCH PRESS, HE USED HIS RIGHT HAND TO FEED STOCK, USING FOOT SWITCH TO JOG PRESS. AMPUTATION, 3 FINGERS."

"THE VINER FEEDER AND VINER WERE NOT RUNNING WHEN HE STARTED CLEANING OUT THE VINER, WHICH HAD PLUGGED UP. THE VINER WAS PUT INTO MOTION ACCIDENTALLY; HIS LEGS WERE CAUGHT AND ENTANGLED IN THE VINER FEEDER. THE RIGHT LEG WAS BADLY TORN AND CUT."

"HE WAS WORKING ON THE INSIDE OF A SILO. A BOLT CAME OUT OF A BOARD OF THE 'SLING' ON WHICH HE WAS STANDING; HE SLID OFF, FALLING 26 FEET. FRACTURED VERTEBRAE."

HOSPITALS, EXC. STATE INSTITUTIONS

This release covers work injuries which were incurred by employees of private and public hospitals.

Included in the private hospitals are "Establishments primarily engaged in providing hospital facilities, and clinics and dispensaries." Excluded are "institutions such as sanatoria, rest homes, convalescent homes and curative baths or spas in which medical or surgical services are not a main function of the institution." (Standard Industrial Classification Manual, 1963 Supplement to 1957 Edition, U. S. Bureau of the Budget)

Included in the public hospitals are city, village, county, and city-county hospitals and related institutions. Excluded are all State institutions.

There were 585 compensable cases settled in 1964: 2 fatal, 36 permanent partial disability and 547 temporary disability cases.

Indemnity and medical aid in these cases amounted to $373,636. This figure includes estimated costs where no medical aid was reported. Apparently, some self-insured county hospitals absorb the cost of medical aid and do not report the amount to the Industrial Commission - in over 40% of the county hospital cases, no medical aid was reported.

Our workmen's compensation statistics clearly show the two biggest safety problems that face hospitals: overexertion and falls.

These two major accident types accounted for over half of the 585 work injuries. About 1 out of every 3 of the injuries was due to overexertion; about 1 out of every 4 was due to a fall.

In 131 of the 183 overexertion cases, the injury occurred while lifting patients. In the majority of these cases, back injuries were incurred. Back injuries are tricky things; the strong possibility of recurrence makes them doubly serious. Modern industry has spent millions on equipment and safety education to bring down the incidence of overexertion; perhaps hospitals should take a leaf from their book and do likewise.

The costliest injuries were those attributed to falls. Over 70% of the falls were on the same level. We checked every third one of these cases and found that, in most instances, the employees slipped and fell because of wet spots or objects on the floor - the objects ranged from "a big black bug" to apple salad. Ironically, two fell on the floors that they had just mopped.

The accident type with the next highest average cost was "bodily reaction." These are cases in which the motion of the employee caused the injury. Although less than half of these cases were due to loss of equilibrium, they accounted for over 85% of the cost. Upon checking every other one of the 15 loss of equilibrium cases, we found the same pattern as in falls - the employees slipped (but did not fall) on wet floors or objects.

Where does the fault lie? In poor housekeeping? In carelessness? It goes without saying that floors should be kept clean <u>and</u> dry; and that slick, highly polished floors are not desirable. By the same token, it behooves the employee to "look where he is going."

Another work hazard inherent to hospitals is "contact with radiations and caustics; toxic and noxious substances." The two tuberculosis cases accounted for over half of the cost of the 48 cases in which this type of exposure was involved. It is interesting to note that there were no such cases involving practical nurses, and only 3 minor cases involving registered nurses.

It appears that nursing schools are doing a good job in teaching practical and registered nurses how to avoid contracting contagious and infectious diseases. Could not all other hospital personnel learn the same through safety education?

There are two other accident type groups that are worthy of study: struck by and struck against. Although the number of cases was about the same (50 and 49, respectively), the cases in which the injured employees struck against objects carried about double the cost of the cases in which the injured employees were struck by objects. This implies a certain carelessness on the part of the employees, and again points out the need for safety education.

Violence also played a part. 31 hospital employees were injured when attacked by patients. These cases occurred in both private and public hospitals; in both general and mental hospitals. This presents a difficult safety problem, indeed.

In over half of the 585 cases, only 2 sources of injury were found: patients and working surfaces.

Patients were the sources of injury in more than 28 out of every 100 cases - rather like biting the hand that feeds you. Purely in the interests of research, we tried to find a case where the employee was injured while being pursued by an amorous patient. Alas, there was none to be found. So much for that.

The number and costs of the cases in which working surfaces were the source of injury reflect the number and cost of cases involving falls. The source of injury classification identifies the object, substance, exposure or bodily motion which directly produced or inflicted the injury. The accident type classification identifies the event which directly resulted in the injury.

More than 40% of the injuries were classified as sprains or strains, and accounted for about 1/3 of the total indemnity and medical costs. Average cost of these cases was $534.

4 kinds of injuries carried average costs of over $1,000: tuberculosis, $10,700; crushing injuries, $9,273; disc protrusions, $3,321; and fractures, $1,010.

Back injuries (back, intervertebral disc, vertebrae) were incurred in about 1/3 of the 585 cases, and cost about 1/3 of the total of $373,636. Although there were only 5 eye injuries, average costs in these cases were $3,320.

The total healing period for the 583 cases (excluding the 2 fatal cases) was 3,622-1/3 weeks, the equivalent of a full year's work for about 70 employees. The average healing period in the permanent partial disability cases was almost 33 weeks; for temporary disability cases, 4-1/2 weeks.

The compensable time loss was 6,108 weeks. In other words, the actual time loss paid for was the equivalent of paying an extra 118 workers for a full year at a wage equal to the amount allowable for work injuries. In the permanent partial disability cases, the average compensable time was 82-1/2 weeks, over a year and a half. The average compensable time for the temporary disability cases was 4-1/3 weeks.

Extra indemnity was paid by employers in the following cases: one employer was assessed a 10% penalty for inexcusable delay in making compensation payments, $3.37; one employer paid treble indemnity of $18.66 for violation of the Child Labor Law; there were 3 cases in which safety orders were held violated in which extra indemnity of $252.16 was paid.

79.5% of the injured employees were female, which reflects the employment pattern. As a matter of fact, female hospital employees comprised 13.8% of all females injured in Wisconsin industry.

The median age of the injured workers was 45; ages ranged from 14 to 80. The average weekly wage of the injured workers was $66.75; weekly wage rates ranged from $20 to $197.

Hospitals, Except State Institutions

Brief descriptions of selected compensable cases
settled in 1964

All cases with indemnity of $1,000 and over

Fatal cases

A 62-year old hospital attendant was fatally injured when she fell from a ladder.

A 51-year old farm manager was crushed to death when he fell from a cultimulcher and was run over by it.

Permanent partial disability cases

A 38-year old nursing aide suffered a disc protrusion (popularly called a slipped disc) when she slipped (loss of equilibrium, not a fall).

A 45-year old hospital attendant fell on stairs - fractured vertebrae.

STATISTICAL DIVISION
STAT. RELEASE 3779

JULY 9, 1965

STATE GOVERNMENTAL EMPLOYEE WORK INJURY CASES

We have a clear mandate from Governor Warren P. Knowles to "establish a more active State employee safety program."

The underlying reasons for this directive can be found in this release. The Governor is deeply concerned about the suffering endured by State employees -- and their families -- due to work injuries.

We share the Governor's concern for the safety and welfare of State employees. The injury frequency program for State employees was inaugurated by our commission, at the behest of former Governor John W. Reynolds, so that we could fill the need for appraisal of our work injury problems.

We have measured the incidence of work injuries during 1964. This first survey indicates the need to (1) appraise accident and injury potential before injuries occur and (2) correct unsafe conditions and acts before injuries occur.

Besides the humanitarian aspects of accident prevention, we must consider the costs of accidents. On-the-job injuries are, at present, costing the State more than a quarter of a million dollars each year in workmen's compensation benefits -- and these costs will continue to rise, with the inevitable increases in benefits and medical costs. Off-the-job injuries and illnesses also cost the State considerable time and money.

What would an accident prevention program cost the State? According to the National Safety Council: "Every dollar invested for prevention returns $6 to $8, within reasonable limits."

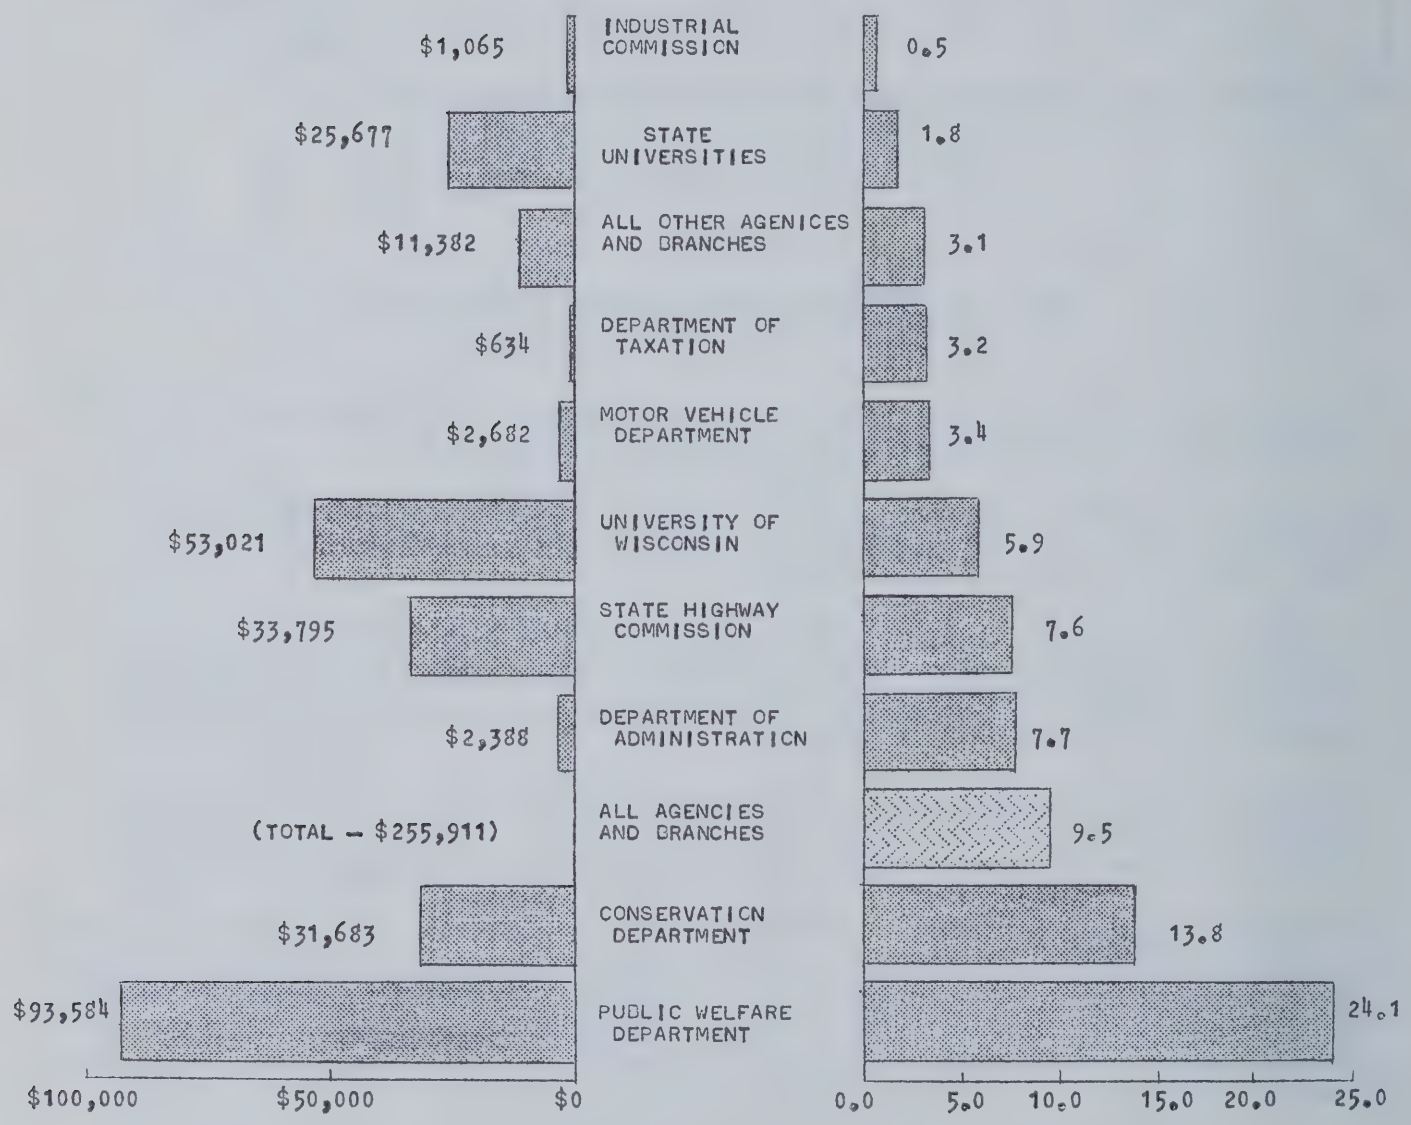
1964 WORK INJURY COSTS AND RATES FOR STATE AGENCIES AND BRANCHES

AGENCIES WITH 1,000,000 OR MORE MANHOURS OF EXPOSURE

RANKED BY INJURY FREQUENCY RATE



TOTAL DIRECT WORKMEN'S COMPENSATION COSTS FOR CASES CLOSED OR DISPOSED OF IN 1964.

NO. OF DISABLING INJURIES INCURRED PER MILLION MANHOURS WORKED IN 1964.

State governmental employee work injury rates

For lost time work injuries incurred in 1964

70 State agencies and departments - reporting for 108 sub-units of State government - cooperated with our Statistical Division in reporting work injuries that occurred in 1964, and corresponding exposure data.

The only major State agency that did not report to us for 1964 was the Senate.

The injury frequency rate for 1964, for the reporting State units as a group, was 9.5 (for 1963, the rate for civilian Federal employees was 7.9 - - the rate for Wisconsin manufacturing establishments employing 2,500 or more persons was 6.2 - - six major divisions of Wisconsin manufacturing averaged a frequency rate of less than 9.5). In other words, between 9 and 10 State employees were injured during each million manhours worked.

The injury severity rate of 314 signifies the average number of days lost or charged, due to the work injury, for each million manhours worked. The average number of days lost or charged per disabling injury was 33.

The first-mentioned rate shows where and how often injuries are occurring. The last two relate to severity and help define the cost of work injuries, because of their close correlation with direct costs.

There were 525 disabling work injuries reported to us - 1 fatal, 7 permanent partial disability and 517 temporary disability cases. Of the temporary disability cases reported, 236 lost from 1 to 3 days of work due to the injury; 281, 4 or more days. Also, 2,847 medical treatment cases, involving loss of less than one full day of work, were reported to us.

The direct costs of such work injuries can be determined from our Workmen's Compensation statistics, when the case is closed or disposed of, but what of the indirect costs? In the 2,847 medical treatment cases, how many hours of work were lost? Most of the time lost was undoubtedly covered by sick leave, for which the State pays.

In all of the cases: was the efficiency of the injured employee lessened temporarily? did fellow-workers lose any working time because of the accident? was any equipment damaged? If all costs of State employee work injuries could be determined, including the costs of administration, the direct cost figure of over a quarter of a million dollars per year might well be doubled, or even tripled. How about the noninjury-producing accidents? What were their costs?

Each State governmental unit with a high injury frequency rate has cause for concern. However, remember that one work injury can give an unreasonably high injury frequency rate to an employing unit with only a few thousand manhours of exposure per year. That is a compelling reason for continuing this survey - to determine if a given injury frequency rate is typical.

Because of the unfortunate lag in reporting State governmental employee work injuries in some instances, it is possible that not all of the work injuries that occurred during 1964 were reported to us. All State employees who are injured and all who are responsible for reporting injuries to us and the Workmen's Compensation Division, should have impressed upon them the importance of prompt reporting.

If all accidents or near-accidents, whether injury resulted or not, were reported and investigated immediately, it is possible that many potential hazards could be eliminated. Equipment and working environment should be checked routinely for potential hazards. It is a sad fact that, all too often, because of budget limitations, State employees are forced to use obsolete and unsafe equipment; too many work areas are crowded and present daily hazards to State employees. Isn't this false economy? Would a private employer be allowed to operate under such conditions?

The State of Wisconsin, as an employer, has the same obligations to its employees that other employers have - and, as an employer, can be forced to pay a 15% penalty in work injury cases if it is held that the State has violated safety rules or safety statutes.

****

All injury rate data were compiled according to the provisions of the American Standard Method of Recording and Measuring Work Injury Experience, Z16.1, approved by the American Standards Association, 1954.

The injury frequency rate is the average number of disabling injuries for each million manhours worked. The injury severity rate is the average number of days lost or charged, as a result of disabling work injuries, for each million manhours worked. The average days lost or charged per disabling injury is the total number of days lost or charged divided by the total number of disabling injuries.

There are some major differences between our work injury rate data and our Workmen's Compensation data:

Work injury rate data are based on hours worked by all employees and work injuries that occurred during a given year. Workmen's Compensation data are based on work injury cases settled or disposed of under the Workmen's Compensation Act of Wisconsin during a given year, regardless of when they occurred.

The progress of an accident prevention program cannot be measured accurately by the use of workmen's compensation volume statistics alone because no account is taken of the variations that affect exposure. Workmen's Compensation statistics, however, provide information for analyzing causal factors and for administrative purposes.

Work injury rate data are reported to the Statistical Division. Workmen's Compensation data are reported to the Workmen's Compensation Division.

Work injury cases of inmates of State institutions are included in our Workmen's Compensation statistics, but not in our work injury rate data.

****

We sincerely appreciate the excellent cooperation that most State units have given us. We hope that this report will awaken - or deepen - concern for the safety of State employees.

State governmental employee workmen's compensation cases
settled or disposed of during 1964

OR

The quarter-of-a-million-dollar story

There were 2,151 cases settled or disposed of during 1964 - 309 compensable, 2 compromise and 1,840 noncompensable - at a direct workmen's compensation cost to the State of Wisconsin of more than a quarter of a million dollars.

The number of cases settled or disposed of increased 90% over comparable cases for 1963, but the total benefits paid increased by less than 1%. This discrepancy is partially due to the large number of medical only cases disposed of during 1964.

<u>In the 309 compensable cases settled</u>:

There was 1 fatal case, 27 permanent partial disability cases and 281 temporary disability cases. (Temporary disability cases involving 4 or more days of disability are compensable.)

The actual compensable time paid for was 2,687-1/3 weeks, the equivalent of paying an extra 52 employees for a full year at a wage equal to the amount allowable for work injuries. The average compensable time for the 27 permanent partial disability cases was 55 weeks; for the 281 temporary disability cases, 2-5/6 weeks.

The total healing period time was 1,281-2/3 weeks, which represents the loss of a year's full time work for about 25 employees. Average healing period for the permanent partial disability cases was 15-1/3 weeks; for the temporary disability cases, 3-1/6 weeks. In many cases, full salary was paid for the healing period time, in lieu of workmen's compensation. (This increased cost is not included in the $255,911.)

There were 5 cases in which inmates of public correctional institutions received compensation for injuries suffered during their incarceration. One inmate received the maximum of $5,000. In an unusual case, one inmate received compensation for temporary disability, because his injury caused temporary disability after he was released from the institution. Statute 56.21 Compensation to injured prisoners:

> "If an inmate of a state institution in the performance of his assigned work is injured so as to permanently incapacitate him or materially reduce his earning power, he may, upon being released from such institution, either upon parole or upon final discharge, be allowed and paid such compensation as the industrial commission finds him entitled to. He shall be compensated on the same basis as he would be had the injury been covered by the workmen's compensation act, except that the total paid to any such inmate shall not exceed $5,000 and may be paid in installments. If the injury results from employment in a prison industry, the payment shall be made from the revolving appropriation for its operation. If there is no revolving appropriation, payment shall be made from the general fund."

Average indemnity dropped from $785 in 1963 to $398 in 1964; average medical aid, from $274 to $192. This was due largely to the proportionately greater number of temporary disability cases.

Safety orders were held violated in 2 cases. Increased benefits amounted to $234.58.

The percentage of cases in which women were injured far exceeded the percentage derived from all of the compensable work injury cases settled in 1964, for all industries in Wisconsin as a whole - for State employees: 46%; for all industries: 14%. (In all 2,151 State cases, the percentage was 33%.)

The median age of the injured workers was 49 (for all industries in Wisconsin as a whole, 40). In contrast, the median age for all of the 2,151 cases was 39.

A reasonable average weekly wage can not be determined for injured State employees, because too few State units report this information.

<u>In the 2 compromise cases settled</u>:

A 45-year old hospital attendant suffered a heart attack while helping to subdue a patient. He claimed permanent total disability, but the State disputed this. The physicians who examined the applicant rendered conflicting opinions on the questions of employment relationship, extent of permanent disability, and need for futher medical care and treatment resulting from the alleged accident. Therefore, a compromise agreement was entered into, paying the applicant on the basis of permanent partial disability.

A 33-year old institution aid contracted infectious hepatitis. Her case, one of temporary disability, was compromised at 85%.

In the 1,840 noncompensable cases:

Medical aid was paid in more than 92% of the noncompensable cases. In 1,598 (94.2%) of the 1,696 cases, $50 or less was paid in medical aid; the average medical aid in these cases was $16. In the other 98 cases, average medical aid was $156.

216 of the injured employees lost one to three days of work due to the injury, with a total healing period of 388 days. 373 of these days were covered by sick leave - another cost to the State that is not included in the total of $255,911. In 4 cases, the injured employees lost a total of 10 working days, none of which was covered by sick leave; in 5 cases, the injured employees lost 12 working days, only 7 of which days were covered by sick leave.

In all of the 2,151 cases:

About 1 out of every 4 of the injured State employees was struck by an object; in over half of these cases, the employee was injured by the object he or she was handling. This suggests a lack of safety education.

The next most frequent accident type was "struck against", which again indicates the need for a safety program. Falls completed the roster of the "Big Three" in accident types (so far as number of cases is concerned). These three accounted for well over half of the injury cases, and about 40% of the indemnity and medical aid. Although falls occurred less frequently than the other two accident types, they were far more costly, accounting for $20 out of every $100 paid in indemnity and medical aid to the 2,151 injured State employees.

The accident type carrying the next highest cost (after falls) was "overexertion". Although less than 7% of the injuries were due to overexertion, these cases cost $18 out of every $100 in indemnity and medical aid.

The 40 traffic accidents also accounted for a high percentage of the indemnity and medical aid - $17 out of every $100.

Injuries due to violence on the part of other persons were incurred by 141 State employees (as might be expected, about 90% were employed by the Public Welfare Department). A surprising number - 87 - were attacked by animals and insects (a closer check on this revealed that the majority of these cases occurred at the University of Wisconsin, with the source of injury being mostly laboratory animals).

About 1 out of every 4 injured State employees suffered cuts, lacerations and abrasions. The next two major injury types, in order of incidence, were sprains, strains and bruises, contusions, accounting together for 1 out of every 4 injuries. Three other injuries occurred frequently: imbedded splinters or chips; fractures; and puncture wounds.

Three injury groups accounted for more than half of the indemnity and medical aid - in order of cost, multiple injuries, 20.7%; fractures, 18.1%; and disc protrusions (commonly called slipped discs), 14.1%. The highest average cost of the three was $2,736 for the 12 disc protrusion cases.

There were 170 occupational disease cases, costing almost $20,000. Almost half of these were dermatitis cases. More than half of the dermatitis cases were caused by poison ivy, poison oak or poison sumac. Another major dermatitis villain was the group composed of soaps, detergents and cleaning compounds. The majority of the other occupational diseases were contagious or infectious diseases.

By far, the largest numbers of injuries affected fingers - almost 26%. About half of the finger injuries were cuts, lacerations and abrasions. This fact, too, demonstrates the need for safety education.

Some thought should be given to eye protection. 148 State employees suffered eye injuries, almost half of them from imbedded splinters or chips.

The limitations of time and space preclude our analyzing the data, department by department. Suffice it to say that there exists a great need for an effective, continuing safety program.

Such a safety program would benefit not only State employees, but Wisconsin taxpayers as well. Although even the best safety program can not eliminate accidents entirely, it has been proven by many private employers that an effective safety program can greatly reduce the costs - monetary for Wisconsin taxpayers, monetary and physical for State employees.

1/ HEALING PERIOD = ACTUAL TIME LOST, DUE TO WORK INJURIES, COUNTING 6 DAYS TO THE WEEK. THERE IS NO HEALING PERIOD, OF COURSE, FOR THE FATAL CASE.

2/ COUNTING 6 DAYS TO THE WEEK, COMPENSABLE TIME = FOR FATAL AND TEMPORARY DISABILITY CASES, ACTUAL DAYS FOR WHICH INDEMNITY WAS PAID; FOR PERMANENT PARTIAL DISABILITY CASES, TIME CHARGES FOR PERMANENT PARTIAL DISABILITY ALLOWED UNDER THE WORKMEN'S COMPENSATION ACT OF WISCONSIN PLUS COMPENSABLE HEALING PERIOD TIME.

3/ INDEMNITY PAID = AMOUNT PAID IN CASH + AMOUNT OFFSET BY PAID SICK LEAVE.

4/ OTHER BENEFITS PAID = FUNERAL EXPENSES ALLOWED, PAYMENTS INTO THE STATE FUND FOR FATAL CASES, AND SUBSEQUENT INCREASES IN REOPENED CASES.

NOTE: IN COMPROMISE CASES, THE MEDICAL AND INDEMNITY ARE NOT SEPARATED, BUT CONSIDERED AS A LUMP SUM — HEALING PERIOD AND COMPENSABLE TIME ARE NOT ASSIGNED TO SUCH CASES.

In the traffic accidents, six State employees were driving cars; one was a passenger in one of those cars; three were pedestrians, making highway inspections when they were struck by cars.

In the nontraffic vehicle accidents, three State employees were killed at construction sites: one was run over by a tractor; one was struck by a sand truck; one caught his hand between the rope and winch cat-head (the coils of rope wrapped around his body and threw him against a derrick socket and trailer hitch).

One State employee drowned when he fell from a barge; another drowned when thrown from a motor boat, after the motor boat made a sharp turn.

When the telephone line he was stringing snapped and hit an overhead power line, a State employee was electrocuted.

A State employee was killed when he fell through a suspended ceiling to the floor below.

One State employee was fatally injured when struck by an unspecified object.

While subduing a patient, a State employee suffered a fatal heart attack.

Work Injury Cases
Settled Under The
Workmen's Compensation Act
of Wisconsin

INSURANCE COMPANIES
AND
EXEMPT EMPLOYERS:

Formal Hearings
and
Summary Data

We wish to congratulate the insurance companies and exempt employers whose records have helped maintain the overall average of 3% or less cases in which formal hearings were required.

However, for exempt private employers, as a group, formal hearings were held in 5.0% of the cases settled or disposed of during 1964, compared with 3.5% for 1963 (for insurance companies, as a group, 2.7% and 2.6%, respectively).

It seems strange that exempt private employers continue to lag behind insurance companies in administration of work injury cases - in respect not only to the number of formal hearings required, but also to the promptness of first payment of compensation and promptness in reporting work injuries.

At any rate, each exempt employer and each insurance company should examine his <u>own</u> record in order to find better and quicker methods for handling work injury cases.

Desiring to help cut down the number of formal hearings, the Industrial Commission has completed pre-trial conference experimentation with favorable results. This program should speed up the process of settling disputed cases and reduce measurably the number of formal hearings required in the future.

Cooperation is the keynote. The State and all other parties concerned will benefit if more work injury cases are settled as promptly and as equitably as possible.

A SELF-INSURED EMPLOYER IS A SUBJECT EMPLOYER EXEMPTED FROM INSURING ALL OR PART OF HIS LIABILITY AS PROVIDED BY THE WORKMEN'S COMPENSATION ACT OF WISCONSIN. AN EMPLOYER WHO HAS BEEN GRANTED EXEMPTION FROM INSURING HIS RISK UNDER THE ACT MAY CARRY EXCESS INSURANCE IN ACCORDANCE WITH REGULATIONS OF THE INSURANCE COMMISSION WITHOUT FURTHER ORDER OF THE INDUSTRIAL COMMISSION. SUCH EXCESS INSURANCE IS NOT DEEMED TO BE FULL COVERAGE. INJURY CASES PROTECTED BY EXCESS INSURANCE ARE CLASSIFIED AS SELF-INSURED.

WISCONSIN CONTRACT CONSTRUCTION

WORK INJURY HIGHLIGHTS

1964

Employment and Disabling Work Injury Rate Data

About 57,500 persons were employed in the contract construction industry in Wisconsin in 1964, an increase of about 2,500 from 1963. The percentage of total nonfarm, nonfederal employment in Wisconsin increased slightly, from 4.5% in 1963 to 4.6% in 1964. Total nonfarm, nonfederal employment in Wisconsin increased by 2.9%; construction employment increased by 4.6%.

The percentage of total employment in construction for the three major industry groups remained about the same. Special Trade Contractors accounted for more than half of the employment; General Building Contractors, for almost a third; and General Contractors, Other Than Building, for about a sixth.

The disabling work injury rate data for 1964 are preliminary. As of May 1, 1965, 2,764 units had reported to us in our annual injury frequency survey (carried out in cooperation with the Bureau of Labor Statistics, U. S. Department of Labor) on the work injury experience of about 31,300 employees. This represents 54.4% of the total employment in 1964.

Between 38 and 39 disabling work injuries occurred during each million man-hours worked in 1964, according to our preliminary data. This represents a 7.6% increase in the number of injuries per million man-hours, compared with 1963 when between 35 and 36 disabling work injuries occurred for each million man-hours worked.

Two of the major industry groups showed a similar increase; one - General Contractors, Other Than Building - showed a decrease. General Building Contractors had the highest rate (44.2); Special Trade Contractors, the lowest (34.2). In the breakdown of major industry group General Building Contractors, those primarily engaged in commercial building had a much higher rate (47.3) than those primarily engaged in residential building (31.7). Almost 30% of those reporting in this industry did not furnish enough information to put them in either category; their rate was high also (47.1).

In the individual industries, Structural Steel Erection had, by far, the highest rate - 73.2; Painting, Paper Hanging and Decorating, the lowest - 19.3.

In the size groups, those employing 50 to 99 workers showed the highest average injury frequency rate in 1964, in contrast to 1963 when the size group employing 100 to 249 workers had the highest. This pattern was reflected by General Building Contractors and Special Trade Contractors, but not by General Contractors, Other Than Building. In the latter, the size group employing 100 to 249 workers had the highest rate for each of the four years (1961 - 1964) surveyed so far.

The average number of days charged or lost during each million man-hours worked showed a 5.6% increase - from 2,432 in 1963 to 2,568 in 1964. The average number of days charged or lost per disabling injury decreased slightly - from 68 to 67.

Compensable Settled Case Data

According to our Workmen's Compensation statistics, five major accident types accounted for more than 30 out of every 100 work injuries: Falls; Struck by; Overexertion; Struck against; and Caught in, on, under, between.

About 25 out of every 100 work injuries were caused by falls. About 65 out of every 100 falls were from a different level (from scaffold, ladder, etc.). Falls alone accounted for $38 out of every $100 payable in indemnity and medical aid. Of the five major accident types listed above, falls had the highest average indemnity and medical aid per case - $1,460.

About 23 out of every 100 construction workers were struck by an object; almost 16 out of every 100 were injured due to overexertion; about 10 out of every 100 struck against an object; almost 8 out of every 100 was caught in, on, under or between objects. The latter group had the next highest average indemnity and medical aid per case (of the five listed above) - $1,420 - accounting for almost $12 out of every $100 payable in indemnity and medical aid.

The major accident type carrying the highest average indemnity and medical aid - $4,486 - was Contact with electric current. Although comprising only 0.5% of the number of cases, this accident type accounted for 2.2% of the amounts payable in indemnity and medical aid.

Two other major accident types, with a low percentage in number of cases, showed high average costs for indemnity and medical aid: Traffic accidents - $2,147, and Explosions, flarebacks, etc. - $2,097.

The last three named accident types caused 38.1% of the fatalities. That is undoubtedly why they carry such a high price tag. The fact that such accidents occurred in only 3.2% of the cases should not obscure their deadliness.

Five injury groups accounted for more than 75% of the cases. In order of incidence, they were: sprains, strains; fractures; cuts, lacerations, etc.; bruises, contusions; and burns.

Sprains and strains were the most common disabling injuries. Taking into consideration like injuries - hernias, disc protrusions, torn muscles, etc. - 29 out of every 100 work injuries fell into this broad category. The disc protrusions were the costliest of this group, with average indemnity and medical aid per case of $2,128.

Fractures, many of them resulting from falls, were suffered by 20 out of every 100 injured workers, accounting for $36.60 out of every $100 payable in indemnity and medical aid. The average indemnity and medical aid per fracture case was $1,739.

Although comprising only 1.4% of the cases, amputations and enucleations accounted for 5.4% of the indemnity and medical aid, with an average indemnity and medical aid per case of $3,545. Crushing injuries also carried relatively high costs - $1,117 average indemnity and medical aid per case.

Over 30 out of every 100 injured workers suffered injuries to the trunk, almost half of the injuries being sprains or strains. The injuries to the trunk accounted for $26 out of every $100 in indemnity and medical aid, with an average cost (indemnity and medical aid) per case of $808.

More than 17 out of every 100 suffered injuries to the leg, with average indemnity and medical cost per case of $945. Fingers were injured in 12.3% of the cases, with a lesser indemnity and medical average cost per case of $533. (Toes carried the least average cost in indemnity and medical aid per case - $175).

The average cost (indemnity and medical aid) of eye injuries per case was the highest of the part of body groups - $2,180. Although comprising only 2.7% of of the cases, they accounted for 6.2% in indemnity and medical aid. (The percentage of 2.7% is higher than that for all industries in Wisconsin; the percentage of eye injuries in Wisconsin industries as a whole generally runs below 2%.) Two of the cases involved enucleations; 20 other workers suffered traumatic loss of vision, mostly when struck by flying or falling objects. Perhaps more construction workers should have some sort of eye protection.

The average cost (indemnity and medical aid) per case in the rest of the injuries: multiple parts, $1,828; head, face, neck, except eyes, $1,176; foot, $1,150 (fractures accounted for 39.0% of the cases and 80.7% of the indemnity and medical aid); arm, $905; body system, $717; and hand, $634.

There were 2,966 compensable work injury cases settled in 1964: 21 fatal, 3 permanent total disability, 369 permanent partial disability and 2,573 temporary disability cases.

Over ~~28~~ 2.8 million dollars were paid in indemnity and medical aid, an average of $48.75 per construction employee. Per injured employee, average indemnity was $701; average medical aid was $245.

The actual time loss paid for (compensable time loss for the fatal, permanent total and temporary disability cases + time charges and compensable healing period for the permanent partial disability cases) was 46,212-1/2 weeks. In other words, the actual time loss paid for was the equivalent of paying an extra ~~8,887~~ 889 workers for a full year at a wage equal to the amount allowable for work injuries.

In the permanent partial disability cases, the average compensable time amounted to almost 73 weeks - well over a year. The average compensable time for the temporary disability cases was about 3-1/3 weeks.

The total healing period for the 2,942 cases (excluding the fatal and permanent total disability cases) was 17,528-1/6 weeks, the equivalent of a full year's work for 337 workers. The average healing period in the permanent partial disability cases was almost 23 weeks; for temporary disability cases, over 3-1/2 weeks.

Extra indemnity was paid by employers in the following violation cases: there were 82 cases in which safety orders were held violated, with extra indemnity of $26,465.30 (78 cases in 1963 with extra indemnity of $26,802.85); there were 5 cases in which double indemnity was paid for violating the Child Labor Law, with extra indemnity of $617.16 (6 and $1,314.45 in 1963); there were 18 cases with a 10% penalty for inexcusable delay in making compensation payments, with extra indemnity paid by the employer of $389.90 (12 and $314.67 in 1963).

1/ COUNTING 6 DAYS TO THE WEEK, COMPENSABLE TIME = FOR FATAL, PERMANENT TOTAL AND TEMPORARY DISABILITY CASES, ACTUAL NUMBER OF DAYS PAID FOR; FOR PERMANENT PARTIAL DISABILITY CASES, TIME CHARGES ALLOWED UNDER THE WORKMEN'S COMPENSATION ACT OF WISCONSIN PLUS COMPENSABLE HEALING PERIOD TIME.

2/ INCLUDING INDEMNITY AND MEDICAL AID; MEDICAL AID INCLUDES ESTIMATED COST IN CONTRACT CASES. EXCLUDED: PAYMENTS FOR FUNERAL EXPENSES, PAYMENTS TO OR FROM THE SECOND INJURIES FUND AND THE CHILDREN'S ADDITIONAL DEATH BENEFIT FUND, PAYMENTS FOR MAINTENANCE DURING REHABILITATION TRAINING PERIODS, THE COST OF ARTIFICIAL MEMBERS FURNISHED, PAYMENTS IN COMPROMISE CASES, ADDITIONAL PAYMENTS IN REOPENED CASES, AND THE AMOUNT OF MEDICAL AID PAYMENTS WHERE THE INJURY DID NOT CAUSE DISABILITY BEYOND THE WAITING PERIOD OF 3 DAYS.

* LESS THAN 0.05%. (C) INCLUDES 3 PERMANENT TOTAL DISABILITY CASES.

TECHNICAL NOTES

Injury rate data were compiled by the Statistical Division of the Industrial Commission of Wisconsin, from data collected in its annual survey of contract construction injury rates. Source: Work Injuries Cooperative Survey, B. L. S. Form 1418, sent to employers in Wisconsin contract construction industries. This survey was made in cooperation with the Bureau of Labor Statistics of the United States Department of Labor.

Reporting under this program is voluntary. The report form furnished both the Industrial Commission and the U. S. Department of Labor with the information needed to compile their respective summaries.

All injury rate data were compiled according to the provisions of the American Standard Method of Recording and Measuring Work Injury Experience, Z16.1, approved by the American Standards Association, 1954.

The injury frequency rate is the average number of disabling injuries for each 1,000,000 employee-hours worked. The injury severity rate is the average number of days charged (or lost), as a result of disabling work injuries, for each 1,000,000 employee-hours worked. The average days charged (or lost) per disabling injury is the total days charged (or lost) divided by the total number of disabling injuries.

Our minimum requirements for publishing injury rate data: 3 reporting units and 500,000 employee-hours of exposure. The required minimum for national rates, published by the U. S. Department of Labor: 3 reporting units and 1,000,000 employee-hours of exposure.

The county and area groups are determined by the location of the reporting establishments.

Workmen's Compensation statistics include only those cases where the injury, or occupational disease, caused a disability that lasted four or more days. Employers under the provisions of the Workmen's Compensation Act are not required to report temporary disability cases to the Industrial Commission which cause disability for three days or less. See Ind 80.02 Workmen's Compensation Rules of Practice. (Data compiled from B. L. S. Form 1418 include all disabling injuries.)

The county and area groups are determined by the location where the injury was incurred, rather than by the location of the reporting establishments.

Benefits paid under the Workmen's Compensation Act do not include payments for funeral expenses, payments to or from the Second Injuries Fund, payments to or from the Children's Additional Death Benefit Fund, payments for maintenance during rehabilitation training periods, the cost of artificial members furnished, nor the amount of medical aid payments where the injury did not cause disability beyond the waiting period of 3 days. Also excluded are the payments in compromise cases, and any additional payments in reopened cases.

Our current Workmen's Compensation statistics are based on the concepts of the American Standard Method of Recording Basic Facts Relating to the Nature and Occurrence of Work Injuries, Z16.2, approved by the American Standards Association, October 4, 1962.

HATS OFF TO WISCONSIN CANNERS !

Look at the record. The number of work injury cases reported by the Canning industry to the Industrial Commission under the Workmen's Compensation Act (usually those with four or more days of disability) dropped from 971 in 1946 to 789 in 1947, to 339 in 1963, and to 295 in 1964.

The average level of total nonfarm canning employment stood at 8,100 in 1964, as compared with 8,200 in 1963, and 10,900 back in 1947 (the earliest year for which we have comparable employment figures). From 1947 to 1964, therefore, employment levels declined 25.7% while the number of injury cases reported declined 62.6%.

THUS, THE YEARLY NUMBER OF INJURIES REPORTED PER 1,000 NONFARM CANNING WORKERS WAS REDUCED FROM 72.4 IN 1947 TO 36.4 IN 1964, REFLECTING A DECLINE OF 49.7%.

The number of compensable injury cases settled (closed cases in which indemnity (compensation) was paid - - many cases are not closed in the same year in which they are reported) also dropped significantly during this same period: 740 in 1946 and 777 in 1947 to 330 in 1963 and 261 in 1964.

Average hourly earnings of nonfarm production workers in the Canning industry rose from about $0.67 in 1946 to $0.85 in 1947, to $1.53 in 1963, and to $1.59 in 1964. On the other hand, manual premium rates for Canneries, N.O.C., including vining stations and fieldmen in connection with canneries (code 2111x), were reduced from $2.23 effective December 31, 1946 to $1.92 effective March 1, 1964. Other closely related classifications also declined; Pickle manufacturing (code 2110), however, increased from $1.23 to $1.63 between these two dates.

It is also noteworthy that the number of disabling or lost-time injury cases incurred per each 1,000,000 hours worked was lower in 1963 than in any year since 1960. Standard injury frequency rates were not computed before 1960, and 1964 data are not yet available. These rates are still considerably higher than the comparable Wisconsin averages for all manufacturing industries, and thus indicate a need for further improvement in accident prevention activities on the part of Wisconsin Canning. All manufacturing injury frequency rates have ranged between 14.2 and 15.2.

Words of wisdom and action expounded at the First Wisconsin Canners Safety Institute, sponsored by the Wisconsin Canners Association, Wisconsin Council of Safety, and Industrial Commission of Wisconsin, and held on April 30, 1946, show why this record has been achieved and the basic thinking underlying the annual Wisconsin Canners' Institutes which have been held since. Words, such as the following brief excerpts, from the First Institute are as befitting today as they were back in 1946:

" * * * Meetings and proceedings, words and printer's ink, will not in themselves make our industry safer for our employes. They are only a means to an end and serve no useful purpose unless you translate the words into action. The Safety Institute accomplishes its purpose only to the extent that you say 'That is something I will do', 'That suggestion applies to my plant', 'That program fits my situation'.

"The Wisconsin canning industry's safety record in the past has not been too bad but there is room for improvement. Let's resolve to improve the record now. Safety pays - in dollars, in production, in uninjured employes."

.....By Mr. M. P. Verhulst, Executive Secretary,
Wisconsin Canners Association

" * * * The problem of accident prevention in individual plants is a problem for top management in that plant. The job of preventing accidents cannot be accomplished by any outside agency except as it calls attention to unguarded machines and unsafe practices. Each company has an independent and responsible job to do and nothing can be accomplished unless top management is convinced that accident prevention is worth while from a moral and economic standpoint and then actively and constructively participates in the safety organization set-up and insists that the plant's performance shall be safe.

"This Wisconsin Canners Safety Institute is an indication of the interest in safety manifested by members of the Canners' Association and it indicates the purpose of many members in this organization to revitalize their safety organizations with a view of actually providing a safe place of work for their employes. Much good may come from this Institute, the first of its kind anywhere in the country which is devoting itself to a study of its own problems with a design to help the members of the organization to greater accomplishments. We wish this effort the greatest success because it involves the preservation of human lives and human faculties, a challenge that is worthy of the finest efforts on the part of its operating canners."

.....By Mr. Voyta Wrabetz, Chairman,
Industrial Commission of Wisconsin

Others who spoke at the first Institute on April 30, 1946 included: Mr. N. J. Law, President, Wisconsin Canners Association, Clyman; Mr. R. H. Winters, The Larsen Company, Green Bay; Mr. John H. Miller, Fall River Canning Company, Fall River; Mr. Harry R. Foerster, M. D., Milwaukee; Mr. Harry J. Burczyk, Commissioner, Industrial Commission of Wisconsin; Mr. Arthur J. CANNING INDUSTRY IN WISCONSIN

Work Injury Highlights - 1964

For the years 1960 through 1963, between 19 and 21 disabling work injuries occurred in the canning industry in Wisconsin during each million manhours worked. (1964 figures are not yet available.) For all manufacturing industries in Wisconsin for the same period, between 14 and 15 disabling work injuries were incurred during each million manhours worked. The exact figures:

	1960	1961	1962	1963
All manufacturing....	14.4	14.2	15.0	15.2
Canning.....	20.8	20.4	21.0	19.3

Our workmen's compensation statistics delineate fairly clearly what kind of accidents are occurring - and their results. To find out why these accidents are happening, the individual employer must survey his own operations. Using the data for 1964 compensable work injury cases settled under the Workmen's Compensation Act of Wisconsin:

1. There were 261 compensable work injury cases settled - 1 fatal, 50 permanent partial disability and 210 temporary disability cases.

2. Almost a quarter of a million dollars was payable in indemnity and medical aid. (Although the number of cases dropped from 330 in 1963 to 261 in 1964, a drop of 20.9%, the total indemnity and medical decreased only by 6.1%.) Average indemnity increased from $461 in 1963 to $571 in 1964; average medical aid increased, also, from $234 to $255. These figures do not include the many other costs incurred as a result of these work injuries.

3. There were 8 injury cases with employer violations of safety orders. The total amount of extra indemnity paid by the employers amounted to $2,665.31. Comparable figures for 1963: 3 cases and $1,089.60 in extra indemnity.

4. There was 1 injury case in which the employer violated the Child Labor Law; extra indemnity paid by the employer in this case was $118.06 (double indemnity).

5. The average weekly wage of the injured employees was $68.90, as compared to $65.01 for 1963.

6. The median age of the injured workers was 43 (the same as in 1963). 22 of the injured workers were under 18 years of age (the youngest was 15), 31 were 18 through 20, and 11 were over 65 (the oldest was 74).

7. The actual time loss paid for (compensable time loss for the fatal case and the temporary disability cases + time charges and compensable healing period time for permanent partial disability cases) was 3,697-2/3 weeks. In other words, the actual time loss paid for was the equivalent of paying an extra 71 employees for a <u>full</u> year at a wage equal to the amount allowable for work injuries. The average compensable time for the 50 permanent partial disability cases was 51-1/3 weeks; for the 210 temporary disability cases, 14-2/3 weeks.

8. The total healing period for the 260 cases (excluding the fatal case from the total of 261) was 1,616-1/2 weeks. This is the equivalent of the loss of a year's full time work by more than 31 workers. The average healing period for the 50 permanent partial disability cases was almost 17 weeks; for the 210 temporary disability cases, 3-2/3 weeks.

9. Falls accounted for more than 20 out of every 100 work injuries, and more than $17 out of every $100 in indemnity and medical aid.

10. Over 31 out of every 100 work injuries occurred when an employee was struck by or struck against an object, accounting for about $26 out of $100 in indemnity and medical aid.

11. Although only about 17 out of every 100 work injuries were due to being caught in, on, under or between objects, almost $35 out of every $100 in indemnity and medical aid was payable for the injuries.

12. Overexertion accounted for 10 out of every 100 work injuries, but only $4.50 out of every $100 in indemnity and medical aid.

13. Machines and machinery were the source of injury in 18 out of every 100 cases, and accounted for almost $30 out of every $100 in indemnity and medical aid.

14. Working surfaces were the source of injury in over 16 out of every 100 cases, and accounted for over $15 of every $100 in indemnity and medical aid.

15. Surprisingly enough, containers were the source of injury in almost 14 out of every 100 cases, but accounted for only a little over $5 of every $100 in indemnity and medical aid.

16. Only about 6 out of every 100 injured employees suffered amputations, but these cases accounted for over $18 out of every $100 in indemnity and medical aid. 10 employees suffered amputation of 1 finger, or a part thereof; 3 lost 2 fingers, or parts thereof; 2 lost 3 fingers or parts thereof; 1 lost part of a toe.

17. Fractures accounted for more than 17 out of very 100 injuries, and over $23 out of every $100 in indemnity and medical aid.

18. Strains, hernias and related injuries occurred in about 23 out of every 100 cases.

19. Employees suffered back injuries in over 12 out of every 100 cases.

20. There were 15 occupational disease cases (21 in 1963): 5 dermatitis cases (11 in 1963), 1 carbon monoxide poisoning case, 8 cases with inflammation or irritation of joints, tendons or muscles, and 1 case of fungus infection.

In many cases, there was a strong correlation between accident type, source of injury and nature of injury. Falls; working surfaces; fractures form such a pattern, as do caught in, on, under and between objects; machines, machinery; amputations and cuts.

Such patterns clearly show that two of the major safety problems to be licked by the canning industry are poor housekeeping and careless handling of machines and machinery.

1/ COUNTING 6 DAYS TO THE WEEK, COMPENSABLE TIME = FOR FATAL, PERMANENT TOTAL AND TEMPORARY DISABILITY CASES, ACTUAL NUMBER OF DAYS PAID FOR; FOR PERMANENT PARTIAL DISABILITY CASES, TIME CHARGES ALLOWED UNDER THE WORKMEN'S COMPENSATION ACT OF WISCONSIN PLUS COMPENSABLE HEALING PERIOD TIME.

2/ HEALING PERIOD = ACTUAL TIME LOST FROM WORK, DUE TO THE WORK INJURY, COUNTING 6 DAYS TO THE WEEK. THERE IS NO HEALING PERIOD, OF COURSE FOR THE FATAL CASE.

NOTE: IN THE VARIOUS TABLES IN THIS REPORT, D.U. = OTHER OR UNSPECIFIED; N.E.C. = NOT ELSEWHERE CLASSIFIED. THESE ARE MADE NECESSARY BY THE FACT THAT TOO OFTEN THE FIRST REPORT HAS NOT ENOUGH DETAIL.

Brief Descriptions of Selected 1964 Compensable Settled Cases in the Canning Industry
(All cases with indemnity of over $1,000)

Fatal case

A 48-year old warehouse worker was holding a steel loading-plate when he fell backwards out of the warehouse onto the ground. The steel plate landed across his chest.

Permanent partial disability cases

A 52-year old truck driver bumped into an unspecified object, crushing his foot. He lost 1-1/2 years working time.

A 58-year old cannery worker caught his hand in a belt, amputating 3 fingers. Employer was held to have violated Wis. Adm. Code section Ind 1.18 (Belts, pulleys, etc.) and paid 15% increased compensation ($517.69)

A 21-year old canning machine operator caught a finger in a filling machine, amputating the index finger near the second joint.

A 43-year old cannery worker struck against a saw, amputating her middle finger near the second joint.

A 32-year old cannery worker suffered fractured vertebrae - no details given.

An 18-year old cannery worker caught her hand in a canning machine, cutting her little finger.

A 60-year old maintenance worker caught her hand in a conveyor, amputating 3 fingers

A 51-year old stationary engineer caught his hand in a belt, amputating his little finger near the second joint.

A 49-year old mechanic bumped into a conveyor, fracturing his forearm.

A 41-year old cannery worker suffered partial loss of vision in one eye when splashed by sodium hydroxide.

A 46-year old cannery worker caught her hand in a filling machine, fracturing her little finger.

A 37-year old machine feeder struck against a cutter, amputating her index finger.

A 46-year old cannery worker fell to the ground from stationary equipment, fracturing his wrist.

A 16-year old cannery worker caught his hand in a viner, amputating his thumb and 1 finger (not index). Employer was held to have violated Wis. Adm. Code section Ind 1.26 (Gears) and paid 15% increased compensation ($217.40).

A 20-year old fork lift operator was struck by an electric hoist and suffered multiple injuries.

A 42-year old packer was caught between a moving car and a stationary object, receiving cuts to the lower leg.

A 17-year old cannery worker caught his hand in an end or payloader, amputating 2 fingers.

A 67-year old laborer caught his hand in a pump, cutting it badly.

A 39-year old cannery worker caught her thumb in a canning machine, fracturing the thumb.

A 47-year old maintenance mechanic fell from a ladder to the building floor, fracturing his upper leg.

A 45-year old mechanic suffered inflammation of his back from repeated motion (riding).

A 55-year old cannery worker suffered a bruised foot when struck by a fork lift truck.

A 65-year old maintenance man fell on ice, fracturing his fibula.

A 74-year old warehouseman received a badly cut forearm when he got it caught in a viner. Employer was held to have violated Wis. Adm. Code section Ind 1.26 (Gears) and paid 15% increased compensation ($526.35).

A 51-year old farm equipment service mechanic caught his hand in a hopper, amputating 2 fingers.

1/ COUNTING 6 DAYS TO THE WEEK, COMPENSABLE TIME = FOR FATAL, PERMANENT TOTAL AND TEMPORARY DISABILITY CASES, ACTUAL NUMBER OF DAYS PAID FOR; FOR PERMANENT PARTIAL DISABILITY CASES, TIME CHARGES ALLOWED UNDER THE WORKMEN'S COMPENSATION ACT OF WISCONSIN PLUS COMPENSABLE HEALING PERIOD TIME.

2/ HEALING PERIOD = ACTUAL TIME LOST FROM WORK, DUE TO THE WORK INJURY, COUNTING 6 DAYS TO THE WEEK. THERE IS NO HEALING PERIOD, OF COURSE, FOR THE FATAL CASE.

NOTE THAT 64 OF THE INJURED EMPLOYEES WERE WOMEN; THEREFORE, ALMOST 1 OUT OF EVERY 4 INJURED EMPLOYEES WERE WOMEN. THE PERCENTAGE OF WOMEN INJURED IN ALL INDUSTRIES AS A GROUP USUALLY RUNS BETWEEN 13% AND 14%.

WISCONSIN CONTRACT CONSTRUCTION

With construction projects gathering momentum, let's take a brief look at the past.

About 57,500 persons were employed in the contract construction industry in Wisconsin in 1964, an increase of about 2,500 from 1963. Total nonfarm, nonfederal employment in Wisconsin increased by 2.9%; construction employment increased by 4.6%.

Unhappily, the incidence of work injuries also increased. Between 38 and 39 disabling work injuries occurred in Wisconsin's construction industry during each million manhours worked in 1964, according to our preliminary data - an increase of 7.6% over 1963.

There were 2,966 compensable work injury cases settled in 1964: 21 fatal, 3 permanent total disability, 369 permanent partial disability and 2,573 temporary disability cases.

Over $2,800,000 were paid in indemnity and medical aid to the 2,966 injured construction employees. Per injured employee, the average indemnity was $701; average medical aid, $245. (If all costs were considered, these figures would be much higher.) The actual time loss paid for was 46,212-1/2 weeks, the equivalent of paying an extra 889 workers for a full year at a wage equal to the amount allowable for work injuries.

Falls constituted one of the major hazards, accounting for about 25 out of every 100 work injuries, and $38 out of every $100 payable in indemnity and medical aid.

There were 82 cases settled in 1964 in which a construction employer was held to have violated safety rules, costing these employers an added $26,465.30 in indemnity. In 34 (41.5%) of these cases, the employee was injured in a fall; the 15% increase in indemnity in the 34 cases amounted to $13,956.72 (52.7%). Not surprising, then, is the fact that the safety rules most often violated by construction employers are those pertaining to ladders and scaffolds.

In the various occupations, almost 4 out of every 100 compensable work injuries were incurred by foremen, and managerial and professional occupations. A few comparisons between these cases and all 2,966 cases show:

	Foreman, etc.	All cases
Indemnity.....	$993	$701
Medical aid.....	$430	$245
Compensable time 1/.....	125 days	93 days

1/ Counting 6 days to the week.

IT IS DIFFICULT TO SELL SAFETY IF THESE MEN HAVE NOT BOUGHT SAFETY THEMSELVES

Remember, injuries and accidents send costs up, slow down jobs, and reduce the ability to compete.

(1) IN ACCORDANCE WITH THE CLASSIFICATION SYSTEM OF THE DICTIONARY OF OCCUPATIONAL TITLES (U.S. DEPARTMENT OF LABOR).

NOTE: IN THE VARIOUS TABLES WHERE ALPHABETICAL LETTERS ARE IN PARENTHESES AFTER A NUMBER, THE LETTER TELLS HOW MANY FATAL CASES WERE INCLUDED IN THE NUMBER OF CASES FOR A GIVEN CATEGORY. FOR EXAMPLE, (A) DENOTES 1 FATAL CASE, (B) DENOTES 2 FATAL CASES, ETC.

O.U. = OTHER OR UNSPECIFIED; N.E.C. = NOT ELSEWHERE CLASSIFIED.

DECISION OF INTEREST, APRIL 1965:

THE EMPLOYE SUSTAINED INJURY WHEN HE FELL THROUGH A WINDOW OPENING UNDER CONSTRUCTION ON AN EXTERIOR WALL. HE WAS STANDING ON A SCAFFOLD ERECTED ON THE THIRD FLOOR, WHICH SCAFFOLD WAS FIVE FEET ABOVE THE FLOOR. THE GROUND, HOWEVER, WAS 28 FEET BELOW THE POINT WHERE HE WAS STANDING. THERE WAS NO GUARDRAIL ACROSS THE OPENING AT THE WINDOW.

THE COMMISSION AFFIRMED THE EXAMINER IN FINDING 15 PER CENT INCREASED COMPENSATION BECAUSE OF VIOLATION OF IND 35.21 (1) AND 101.06, WISCONSIN STATUTES. THE COMMISSION POINTED OUT THAT SINCE A HAZARD EXISTED AT EACH OPENING IN AN OUTER WALL, SUCH OPENINGS MUST BE GUARDED. THE REQUIRED HEIGHT FOR GUARDRAILS REFERS TO EITHER THE HEIGHT ABOVE THE FLOOR OR GROUND, WHICHEVER IS GREATER.

COMMENTS

The basic provisions of the Workmen's Compensation Act apply to all compensable injury cases, without regard to how the injury occurred. There are, however, three classes of injury cases in which the law gives the claimant increased indemnity and death benefits, and one class in which the indemnity is decreased.

Section 102.57 provides: "Where injury is caused by the failure of the employer to comply with any statute or any lawful order of the commission, compensation and death benefits as provided in this chapter shall be increased by 15 per cent. Failure of an employer reasonably to enforce compliance by employes with such statute or order of the commission shall constitute failure by the employer to comply with such statute or order."

In determining liability for increased compensation because of violation of an order or statute, it is necessary not only to find violation, but it must also be found that the injury was caused by the violation. If the deputy of the Industrial Commission concludes that there was violation by the employer, and the safety department approves this conclusion, the employer is accordingly notified and requested to make payment of 15% increased compensation. He is given a written statement on the conditions and practices noted which exist in violation of state safety rules, after the needed changes and recommendations have been discussed with him. Such a statement gives no guaranty that the violations called to the employer's attention are the only ones existing in his plant.

Section 102.58 provides: "Where injury is caused by the failure of the employe to use safety devices where provided in accordance with any statute or lawful order of the commission and adequately maintained, and their use is reasonably enforced, by the employer, or where injury results from the employe's failure to obey any reasonable rule adopted by the employer for the safety of the employe and of which the employe has notice, or where injury results from the intoxication of the employe, the compensation and death benefit provided herein shall be reduced 15 per cent."

Reduction of compensation for failure to obey a reasonable rule adopted by the employer can be made only where a definite order or rule is shown and where the employe had notice of the rule. Compensation is not decreased where the employer acquiesces in failure of the employee to use safety devices, or where the employer fails to make a reasonable effort to enforce safety rules.

Section 102.60 of the Workmen's Compensation Act provides that a minor who is injured while he is employed, in violation of the provisions of the Child Labor Law, shall receive increased compensation for his injury.

Double indemnity benefits are payable in cases where the employer has not secured the required Child Labor permit. In cases where the employer required, suffered, or permitted the minor to work - either with or without the required child labor permit - in an employment which is prohibited to a child of the age or sex of the injured minor, treble indemnity benefits are payable.

In both instances, the increased compensation liability is a fixed allowance in relation to the normal compensation payable in a given case. However, if the amount recoverable under the double and treble liability provisions is less than the wage loss sustained by the minor employee, then liability exists for such wage loss.

An amendment to the Workmen's Compensation Act of Wisconsin, effective July 1, 1957, limits the increased compensation and the increased death benefits to $5,000 in a double liability case, and to $7,500 in a treble liability case (Sec. 102.60 /9/). Also, since July 1, 1957, the double liability and treble liability provisions of the Workmen's Compensation Act do not apply to an employer as respects minors employed by a contractor or a subcontractor, unless the given employer knew, or should have known, that the injured minor was illegally employed by the contractor or subcontractor (Sec. 102.60 /8/).

There are several ways in which the employer can protect himself. He should never employ a minor under 18 years of age, without first having on file a labor permit or an approved apprenticeship indenture naming him as the employer of the child. Proof of age should be required of all would-be employees who are suspected minors - such as birth or baptismal records or age certificates, which are also available for those between 18 and 21. Sec. 103.75 provides that the Industrial Commission shall have power to issue age certificates for minors which shall be conclusive evidence of their ages in any proceedings under any of the labor laws and the Workmen's Compensation Act of this state. Permit officers are authorized to issue these age certificates.

A minor should not be allowed to work at employment prohibited to a minor of his age or sex, unless he is an indentured apprentice under Chapter 106.01. The employer should guard against the minor shifting to unauthorized activities. Also, minors should not be allowed to work under hazardous conditions which are outlawed by the minimum safety standards fixed by the Safety Rules of the Industrial Commission.

* * * * * * * *

Section 102.62 provides that in case of liability for increased compensation or increased death benefits under Sec. 102.57 or Sec. 102.60, the liability of the employer shall be primary, and the liability of the insurance carrier, secondary. All increased compensation must be paid by the employer himself, unless the employer is shown to be insolvent or out of business.

SELECTED SERIOUS WORK INJURIES REPORTED IN MARCH 1965:

A 20-YEAR OLD HANDYMAN REACHED INTO A PRESS WITH RIGHT HAND TO REMOVE A PIECE OF SCRAP. HIS LEFT HAND ACTIVATED THE "RUN" BUTTONS. THE PRESS CYCLED AND RAM CAME DOWN ON HIS ARM — TRAUMATIC AMPUTATION, RIGHT FOREARM.

SHE WAS STANDING ON A STEPLADDER, REPLACING A LIGHT BULB. SHE FELL AND HIT HER BACK ON A THEATRE SEAT. SHE IS SCHEDULED FOR AN OPERATION (SPINAL FUSION).

EMPLOYEE CAUGHT LEFT HAND BETWEEN PINCH ROLLS OF SLITTER MACHINE — AMPUTATION OF FINGERS AND PART OF THE HAND.

EMPLOYEE STEPPED UP TO FREE A CAN IN THE CABLE LINE. WHEN HE JUMPED OFF THE STEP, THE RING ON HIS LITTLE FINGER CAUGHT IN THE BRACING — LITTLE FINGER TORN OFF AT METACARPAL.

TRACTOR DRIVER DROVE INTO FERTILIZER BIN FOR LOAD OF FERTILIZER. PILE OF FERTILIZER FELL DOWN, HITTING TRACTOR AND DRIVER — FRACTURES, HIP, PELVIS, RIBS.

1/ HEALING PERIOD = ACTUAL TIME LOST FROM WORK, DUE TO THE WORK INJURY, COUNTING SIX DAYS TO THE WEEK. THERE IS NO HEALING PERIOD, OF COURSE, FOR THE FATAL AND PERMANENT TOTAL DISABILITY CASES.

2/ COMPENSABLE TIME = FOR FATAL, PERMANENT TOTAL AND TEMPORARY DISABILITY CASES, ACTUAL NUMBER OF DAYS PAID FOR; FOR PERMANENT PARTIAL DISABILITY CASES, TIME CHARGES ALLOWED UNDER THE WORKMEN'S COMPENSATION ACT OF WISCONSIN PLUS COMPENSABLE HEALING PERIOD TIME.

(A) INCLUDES 1 PERMANENT TOTAL DISABILITY CASE; (E) INCLUDES 5 PERMANENT TOTAL DISABILITY CASES; (F) INCLUDES 6 PERMANENT TOTAL DISABILITY CASES; (K) INCLUDES 11 PERMANENT TOTAL DISABILITY CASES.

1/ HEALING PERIOD = ACTUAL TIME LOST FROM WORK, DUE TO THE WORK INJURY, COUNTING 6 DAYS TO THE WEEK. THERE IS NO HEALING PERIOD, OF COURSE, FOR THE FATAL AND PERMANENT TOTAL DISABILITY CASES.

2/ COUNTING 6 DAYS TO THE WEEK, COMPENSABLE TIME = FOR FATAL, PERMANENT TOTAL AND TEMPORARY DISABILITY CASES, ACTUAL NUMBER OF DAYS PAID FOR; FOR PERMANENT PARTIAL DISABILITY CASES, TIME CHARGES ALLOWED UNDER THE WORKMEN'S COMPENSATION ACT OF WISCONSIN PLUS COMPENSABLE HEALING PERIOD TIME.

3/ IN FORMER YEARS, THE SOURCES OF OCCUPATIONAL DISEASES WERE LISTED SEPARATELY. IN THIS RELEASE, THE SOURCES OF OCCUPATIONAL DISEASES AND THE SOURCES OF ACCIDENTAL INJURIES ARE TREATED AS ONE. THE SOURCES OF OCCUPATIONAL DISEASE ARE LISTED IN STAT. RELEASE 3766, OCCUPATIONAL DISEASE, 1963.

MEMO

TO: All insurance carriers licensed to write workmen's compensation insurance in Wisconsin; all exempt employers in Wisconsin

FROM: The Industrial Commission of Wisconsin

RE: PROMPTNESS OF FIRST PAYMENT OF COMPENSATION DURING 1964

We wish to congratulate the insurance carriers and exempt employers who had good records in 1964. Our special commendations go to those who have been consistent in this respect during the past few years.

However, Table 433.29 (see page 2 of this release) shows all too clearly that the percentage of all cases with prompt first payments has steadily decreased during the past ten years. The reader will also note that the same pattern obtains in regard to prompt reporting of work injuries.

Therefore, we plan to institute a series of interviews to ascertain why some companies have consistently poor records - and what can be done to remedy the situation. This same procedure will be followed in interviewing the companies who started well, but whose records are now nosediving.

The downward trend in percentage of prompt first payments must be reversed. Corrective measures must be adopted immediately - your future insurance or exemption privileges may depend on your cooperation.

1/ AN EXEMPT EMPLOYER (SELF-INSURER) IS A SUBJECT EMPLOYER EXEMPTED FROM INSURING ALL OR PART OF HIS LIABILITY AS PROVIDED BY THE WORKMEN'S COMPENSATION ACT OF WISCONSIN. AN EMPLOYER WHO HAS BEEN GRANTED EXEMPTION FROM INSURING HIS RISK UNDER THE ACT MAY CARRY EXCESS INSURANCE IN ACCORDANCE WITH REGULATIONS OF THE INSURANCE COMMISSION WITHOUT FURTHER ORDER OF THE INDUSTRIAL COMMISSION. SUCH EXCESS INSURANCE IS NOT DEEMED TO BE FULL COVERAGE. INJURY CASES PROTECTED BY EXCESS INSURANCE ARE CLASSIFIED WITH EXEMPT EMPLOYERS.

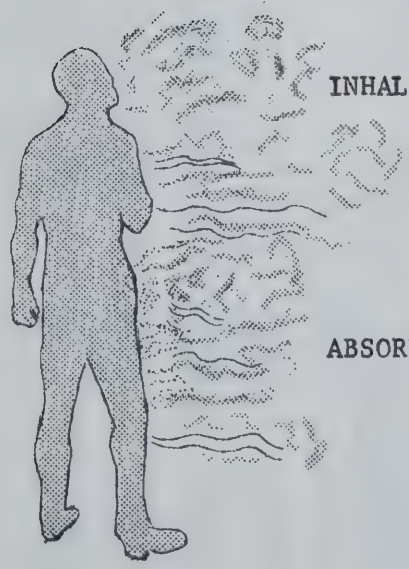
OCCUPATIONAL DISEASES

There were 1,044 compensable occupational disease cases settled during 1963 - 5 fatal cases, 8 permanent total disability cases, 40 permanent partial disability cases and 991 temporary disability cases. The indemnity and medical aid amounted to almost one million dollars.

Three exposure types accounted for more than 80% of the cases and costs:

REPEATED MOTION

Accounted for 24.0% of the occupational disease cases, and 18.0% of the indemnity and medical aid.



INHALATION of caustics and radiations; toxic and noxious substances accounted for 10.1% of the occupational disease cases, and 49.0% of the indemnity and medical aid.

ABSORPTION of caustics and radiations; toxic and noxious substances accounted for 46.9% of the occupational disease cases, and 14.8% of the indemnity and medical aid.

(A) = 1 PERMANENT TOTAL DISABILITY CASE; (E) = 5 PERMANENT TOTAL DISABILITY CASES; (G) = 7 PERMANENT TOTAL DISABILITY CASES.

1/ HEALING PERIOD = ACTUAL TIME LOST FROM WORK, DUE TO THE WORK INJURY, COUNTING 6 DAYS TO THE WEEK. THERE IS NO HEALING PERIOD, OF COURSE, FOR THE FATAL AND PERMANENT TOTAL DISABILITY CASES.

2/ COUNTING 6 DAYS TO THE WEEK, COMPENSABLE TIME = FOR FATAL, PERMANENT TOTAL AND TEMPORARY DISABILITY CASES, ACTUAL NUMBER OF DAYS PAID FOR; FOR PERMANENT PARTIAL DISABILITY CASES, TIME CHARGES ALLOWED UNDER THE WORKMEN'S COMPENSATION ACT OF WISCONSIN PLUS COMPENSABLE HEALING PERIOD TIME.

3/ INCLUDES 1 CASE IN WHICH THE LITTLE FINGER WAS SURGICALLY AMPUTATED AT THE PROXIMAL JOINT.

R/ REVISED.

1/ HEALING PERIOD = ACTUAL TIME LOST FROM WORK, DUE TO THE WORK INJURY, COUNTING 6 DAYS TO THE WEEK. THERE IS NO HEALING PERIOD, OF COURSE, FOR THE FATAL AND PERMANENT TOTAL DISABILITY CASES.

2/ COUNTING 6 DAYS TO THE WEEK, COMPENSABLE TIME = FOR FATAL, PERMANENT TOTAL AND TEMPORARY DISABILITY CASES, ACTUAL NUMBER OF DAYS PAID FOR; FOR PERMANENT PARTIAL DISABILITY CASES, TIME CHARGES ALLOWED UNDER THE WORKMEN'S COMPENSATION ACT OF WISCONSIN PLUS COMPENSABLE HEALING PERIOD TIME.

(A) INCLUDES 1 PERMANENT TOTAL DISABILITY CASE; (E) INCLUDES 5 PERMANENT TOTAL DISABILITY CASES; (G) INCLUDES 7 PERMANENT TOTAL DISABILITY CASES.

1/ HEALING PERIOD = ACTUAL TIME LOST FROM WORK, DUE TO THE WORK INJURY, COUNTING 6 DAYS TO THE WEEK. THERE IS NO HEALING PERIOD, OF COURSE, FOR THE FATAL AND PERMANENT TOTAL DISABILITY CASES.

2/ COUNTING 6 DAYS TO THE WEEK, COMPENSABLE TIME = FOR FATAL, PERMANENT TOTAL AND TEMPORARY DISABILITY CASES, ACTUAL NUMBER OF DAYS PAID FOR; FOR PERMANENT PARTIAL DISABILITY CASES, TIME CHARGES ALLOWED UNDER THE WORKMEN'S COMPENSATION ACT OF WISCONSIN PLUS COMPENSABLE HEALING PERIOD TIME.

3/ INCLUDING 1 CASE IN WHICH THE LITTLE FINGER WAS SURGICALLY AMPUTATED AT THE PROXIMAL JOINT.

NOTE: ALTHOUGH MEDICAL AID IS NOT SHOWN IN SOME CASES, THIS DOES NOT NECESSARILY MEAN THAT THERE WAS NO MEDICAL AID. IN MOST OF THESE CASES, THERE WAS CONTRACT MEDICAL AID.

T = TEMPORARY DISABILITY; PPD = PERMANENT PARTIAL DISABILITY; PTD = PERMANENT TOTAL DISABILITY; F = FATAL.

DECISIONS OF INTEREST

APPLICANT FELL AND INJURED HIS LEFT KNEE WHILE GOING FROM WORK WALKING FROM THE EMPLOYER'S PLANT TO ITS PARKING LOT ACROSS THE PUBLIC STREET. THE FALL OCCURRED ON THE STREET, WHICH WAS NOT THE "PREMISES" OF THE EMPLOYER. IT WAS HELD THAT INJURY DID NOT OCCUR IN THE COURSE OF OR ARISE OUT OF THE EMPLOYMENT, AND APPLICATION WAS DISMISSED.

CLAIM WAS MADE FOR EXPENSE FOR CHRISTIAN SCIENCE TREATMENT IN LIEU OF MEDICAL TREATMENT IN THE SUM OF $909. THE EXAMINER FOUND LIABILITY BUT WAS SET ASIDE BY THE COMMISSION. THE APPLICANT SUFFERED BRUISES AND SPRAINS IN AN AUTOMOBILE ACCIDENT, WHICH RESULTED IN NO WAGE LOSS AND NO CLAIM WAS MADE FOR PERMANENT DISABILITY. APPLICANT ARRANGED WITH CHRISTIAN SCIENCE PRACTITIONERS IN KANSAS CITY, MISSOURI, NEW YORK, N.Y., AND LAWRENCE, KANSAS, FOR HER TREATMENT. THE COMMISSION FELT THAT SINCE THIS TREATMENT IS IN LIEU OF MEDICAL TREATMENT THAT THE SAME TESTS SHOULD BE APPLIED TO IT. AN EMPLOYE IS NOT PERMITTED TO SEEK MEDICAL TREATMENT ANYWHERE HE CHOOSES THROUGHOUT THE COUNTRY IF THERE IS ADEQUATE TREATMENT TO BE OBTAINED IN THE STATE. THERE ARE NUMEROUS CHRISTIAN SCIENCE PRACTITIONERS DULY CERTIFIED WITHIN THE STATE. THE APPLICANT HAS MADE NO SHOWING WHY SHE WAS REQUIRED TO GO OUTSIDE THE STATE FOR TREATMENT AND THE REASONABLENESS OF THE CHARGES WERE NOT ESTABLISHED. WHILE ACTION WAS STILL PENDING BEFORE THE COMMISSION, WRITTEN STIPULATION WAS SUBMITTED TO COMPROMISE CLAIM AT $400. THIS WAS APPROVED BY THE COMMISSION.
